

## FIGHT NARROWS TO PROHIBITION

Debate on House Bill as Amended By Senate Committee Proceeds

## LODGE OPENS CONTEST

Senator Says He Will Vote for Bill But Opposes Some of Its Provisions As Amazing

## DELAY IN PROSPECT

WASHINGTON, June 28.—The fight in congress over government control of food and other necessities today virtually narrowed to the question of prohibition.

### Substitute House Bill.

The house control bill as amended by the senate agriculture committee was substituted in the senate for its original draft and debate proceeded, Senator Lodge opening the prohibition contest with a speech in favor of continuing manufacture of beer and wine. The bill as it now stands would prohibit the manufacture of all intoxicating beverages, but empower the president to exempt wines.

Sensors Johnson of California and Kellogg, of Minnesota, delivered prepared speeches on the general features of the bill promising it their support as a war measure.

Lapse of several days before discussions and set speeches over provisions of the prohibition fight develops in earnest is in prospect. There is pending a motion by Senator Hardwick to send the bill back to the committee on the ground that prohibition and other important sections are unconstitutional.

May Resort to Closure.

Senate sentiment is said to favor stopping manufacture of distilled spirits, so the debate will center on beer and wines. Resort for the first time to the senate's new cloture rule in an effort to hasten action may be attempted also there is such a marked division of opinion over the question of permitting brewing to continue that leaders say it would be impossible to secure cloture. Senator Chamberlain in charge of the bill said tonight he hoped general speech making would end tomorrow and that the senate by Saturday would begin considering committee amendments, expected to take several days.

The prohibition sections under such procedure would be reached last.

Senator Johnson, opening debate on the substitute bill declared its enactment necessary to win the war. "America must make the sacrifice in dollars and creature comforts within the next year or she must make thereafter the sacrifice in men and then ultimately the sacrifice in material things as well," he said.

"The short cut to victory is organization and this organization can come only with a concentration of authority. It is therefore with an absolute confidence that I give my vote to a bill according to the most extraordinary and autocratic powers ever before conferred in our nation."

Must Be Sacrifice of Profits.

There must be sacrifice of profits just as there is sacrifice of blood, the senator said, and he added: "While of course legitimate enterprise during the conflict should be nurtured and encouraged it must be understood from the very beginning that no profitable patriotism will be tolerated. If a concrete illustration were required to demonstrate the necessity for some sort of legislation in relation to prices it is found in the recent discussion concerning the steel corporation. We find before the war this corporation selling its product from \$21 to \$25 a ton. At the beginning of 1916, its contracts for the delivery of steel plates to commercial shipbuilding concerns was \$42.56 per ton and very recently it asked from the United States government \$95 per ton.

"When an ordinary man sees his loved boy snatched from his home to be shot to pieces upon a foreign soil, and reads of profits asked by a corporation created by his government of six hundred millions per year during the war, he cannot be blamed for the demand in which our people unite, and in which the congress unites by the passage of just such bills as this."

Oppose Some Provisions.

Senator Lodge, saying he would vote for the bill after it had been carefully considered, opposed some of its provisions as amazing and said public "excitement" for food control legislation is pressing on congress with little public conception of the powers the bill proposes to confer.

## GIVE OUT PLANS FOR FLOATING PLATTSBURGH

NEW YORK, June 28.—Plans for a floating Plattsburgh were made public here tonight by the National Marine League of the United States. To officer and men an American merchant marine adequate to cope with the German submarine menace. The league states that upward of 10,000 officers and 50,000 able seamen will be required. There will be great need of these trained men after the war it was said to hold the United States in the foreign trade of the world. The league advocates the immediate establishment and operation of a national nautical training school system that would enable each state to educate annually its quota of young men to become officers and seamen in the American merchant marine.

The league suggests that \$100,000 be raised by popular subscription to equip ships for training schools and that every state be urged to join the plan by establishing its own school ship.

## COMPLETE REPORTS FROM GEN. PERSHING LACKING

War Department Remains Silent Regarding Landing

Plans for Americans to Take Over Part of Battle Line Closely Guarded—Some Time Must Elapse as Men Must Be Acclimated

WASHINGTON, June 28.—Complete reports from Major General Pershing upon landing of his first expedition in France still were lacking tonight, and the war department remained silent. The delay may be accounted for by the report that until today General Pershing did not personally visit the American encampment.

At the navy department reports are awaited from the command of the convoy that accomplished without a marred incident, so far as known, one of the greatest tasks ever assigned a naval force.

There was much discussion today as to when the American forces will take over a part of the great battle line in France. Whatever plans have been made in this regard are closely guarded.

In a general way however, it is known that some time must elapse before the men can be sent into the trenches. The men, fresh from the tropics or from the Mexican border, must be acclimated to prevent sickness.

Admittedly the first purpose of sending the force in the brief period that was allowed to make ready and get them across was political.

It is understood to be the sentiment rather than practical arguments advanced by members of the French and British commissions which influenced the Washington government in despatching General Pershing and his men. There will be no let up to the effort to keep the force now in France fully supplied with everything an army needs. When other divisions are sent has not been announced but the work of making them ready is going ahead day and night in every section of the country.

## NAME COMMITTEE TO ACT WITH HOOVER

CHICAGO, June 28.—A committee to co-operate with Herbert C. Hoover food administrator in the conservation of dairy foods was named today by the National Dairy Council. Each of the allied industries, producers, breeders associations, distributors, butters and cheese makers, condensers and ice cream makers has pledged itself to hearty support of measures to conserve the dairy animal and milk supply.

The Hoover committee contains three producers, two distributors and two manufacturers of milk products. They are M. D. Munn, president National Dairy Council; R. D. Cooper, president Dairyman's league; N. V. Hull, president National Dairy Council; John Le Ferber, president International Milk dealers association; G. E. Haskell, for the butter, egg and poultry trades; J. A. Cooper and one to be selected for the manufacturers of allied industries.

## AUSTRIANS DEBATE INTERPELLATION

AMSTERDAM, June 28.—The Austrian chief of embassy yesterday debated an interpellation introduced by Socialist members, favoring the opening of peace negotiations. The interpellation also urged the right of the peoples to determine their own destinies.

Premier Von Sydler took exception to the interpellation and insisted upon the necessity of upholding the well tried alliance with Germany. He said the Austro-Hungarian government in concert with its allies already to enter into negotiations with the enemy for an honorable peace. But it firmly declined any other basis for peace negotiations.

## SINK DANISH SHIP OUTSIDE SEA WAR ZONE

COPENHAGEN, June 28.—Sinking a German submarine outside the prohibited zone and without examination of the 456 ton Danish steamer Ivgut was reported by her commander on his arrival here today.

The captain says his ship was keeping well clear of zone without the slightest warning a torpedo was fired but did not damage the ship, passing under her. The submarine then emerged and sent the Ivgut to the bottom by artillery fire. The submarine commander left the Danish vessel's crew in their boats 150 miles from land. The sinking was carried out without even an inquiry as to the name of the vessel.

## COMMITTEE CONSIDERS AUTHORIZING BONDS

Senator Stone Proposes Bond Issue of \$500,000,000

Committee Plans to Reach a Decision and to Fix the Rate to be Imposed on War Excess Profits, Probably Sixteen Per Cent

WASHINGTON, June 27.—With revision of the war tax bill virtually completed and now totalling \$1,449,000,000 against the \$1,800,000,000 levy of increased taxes adopted by the house, the senate finance committee today considered authorization of additional bonds.

Senator Stone formally proposed a bond issue of \$500,000,000. The committee plans to reach a decision tomorrow and to fix the rate to be imposed on war excess profits—probably 16 per cent. During long committee discussion of the bond question a larger issue was not suggested altho with a half billion of bonds Senator Simmons said the bill still would fall short by \$200,000,000 and probably more of meeting the ensuing year's war expense.

From excess profits the committee now plans, under its latest estimates to raise \$300,000,000. An amendment adopted today would exempt from the tax on individuals, persons in office or employment including that of commercial traveler or agent whose remuneration consists wholly of a fixed and definite sum irrespective of amount of business done or any other contingency, and a provision the profits of which depend mainly on the personal qualifications of the individuals. \* \* \* And in which there is not required the investment of more than nominal capital.

### Would Be a Shock

Earl D. Bapst, president of the American Sugar Refining company, said the repeal of the drawback would be a shock to business men. "The drawback device of providing free raw materials to American manufacturers for export purposes," he said, "is more than century old and was supposed to be one of our business anchors that would not be pulled especially with the present export outlook."

"The action of the committee places the United States at a disadvantage in the world sugar market."

## RED CROSS OWNS HERD OF DAIRY COWS

WASHINGTON, June 28.—Red Cross officials today found their organization the owner of one herd of dairy cows, a fat Plymouth Rock hen and a dozen eggs, a dozen gold and silver medals of various kinds, much jewelry and quantities of merchandise—donations to the Red Cross war fund from persons who could not give money. A Slav woman of Middleton, Ohio, donated the hen and eggs. The local committee auctioned the eggs for \$1.75 and the hen for \$266. Both were returned by the buyers for resale and will be sent to headquarters here. Officials said they would be forwarded to New York for sale at auction in Wall Street.

Cows, hogs, horses and other livestock have been given by farmers in a number of states. A negro woman in Youngstown, Ohio, had no money, but volunteered to do a day's washing. The work was given her and the pay was turned into the Red Cross fund. An Oklahoma boy gave his Airedale terrier. Everything donated that cannot be used directly in relief work will be sold and the proceeds added to the \$115,000,000 subscribed.

## SEEK VIGOROUS SUPPORT OF PARISH SCHOOLS

BUFFALO, N. Y., June 28.—In closing its fourteenth annual convention today the Catholic Educational association adopted by resolution the slogan "Every Catholic child in a Catholic school" as a special program of parish work for the year.

The 1,000 delegates approved the language of the resolution which asked for a vigorous policy in support of the parish schools, because of the necessity for religious education in this crisis.

A war resolution added recognized as proper obedience to law and patriotic devotion to the country's welfare, and response of the young men in Catholic colleges and universities to the call of duty in war. Another urged parents to follow President Wilson's injunction to keep their children in schools and colleges during the war, so that their interests and the interests of the nation may not suffer unduly by an interruption of their studies.

## ROUMANIAN MISSION REACHES WASHINGTON

WASHINGTON, June 28.—Rumania's mission to the United States reached Washington today unannounced.

Dr. Vascel Lucia is the head of the party and is accompanied by Johan Mota and Lieut. V. Stoen. They will call at the state department tomorrow. The mission is not strictly of a diplomatic character and will devote itself largely to efforts to stimulate recruiting for the Rumanian army among their fellow countrymen in America.

## DANIEL CALLAGHAN KILLED

Camp Borden, Ont., June 28.—Daniel Callaghan a royal flying corps captain who had won distinction in France was killed in an airplane accident at Camp Hoare, last night as was announced today. With a cadet named Francis, Captain Callaghan started to fly to Toronto. The wing of the machine struck a tree and the plane crashed to the ground pinning Captain Callaghan under it.

## AGREE ON COAL PRICE REDUCTIONS

Operators and Government Officials Fix New Prices at Conference

## TO BE EFFECTIVE JULY 1

Reductions in Price To Public Will Range from One to Five Dollars a Ton

## AFFECTS ONLY SOFT COAL

WASHINGTON, June 28.—The sweeping reductions in the price of bituminous coal at all mines east of the Mississippi river ranging from one to five dollars a ton to the public with a further cut of fifty cents for the government were agreed upon today at conferences between the operators and government officials. The new prices become effective July 1st.

### Four Hundred Represented.

Four hundred operators who gathered here yesterday at a call from Secretary Lansing and pledged themselves to furnish their product at a reasonable price were represented in the final conference by committees from each field. Early in the day they had agreed to place the price fixing in the hands of the government thru the defense council's coal production committee, Secretary Lane and Commissioner Fort of the federal trade commission, thus avoiding the possibility of violating the anti-trust laws.

Director Smith of the geological survey estimated that the reduced prices would mean that the operators would get \$180,000,000 less annually for their output and that the saving to the government and the coal consuming public would be even greater.

### Allow Only One Commission.

In addition to placing prices on coal at the mines it was announced that jobbers, brokers, retailers and commission men would be permitted to charge commissions of not more than 25 cents a ton and that no more than one commission should be charged. In other words the consumer will get his coal at the mine price plus transportation charges and 25 cents per ton.

The agreement does not affect anthracite and the coal production committee announced tonight that action on that problem had been postponed until after July 1 by agreement with the operators. The anthracite producers have indicated willingness to meet the government in the same spirit manifested by the bituminous men.

In the final conferences trade secrets between competitors, cost prices, and other confidential information was laid on the table and the government, acting as judge, decided what would be the highest prices paid at mines, prices to go into effect on the first of July to stay in effect until investigations are made and other changes ordered.

Representatives from various states were asked to quote the minimum price at which they could furnish coal. The Clearfield district of Pennsylvania agreed to cut its price for coal as it was loaded at the mouth of the mine from \$5.25 to three dollars with \$3.50 for lump sizes. Tennessee came down from \$4.50 to \$3. Virginia did likewise. West Virginia reduced the contract price of \$5.60 to \$3 and Illinois and Indiana reduced their prices to \$2.75 for coal as it came from the mine. Alabama, which mines under difficult conditions with special expenses, reduced its price from \$5.50 to \$3 at the highest.

Maryland lowered its estimate from \$5.75 to the standard figures, \$3 and \$3.50. The remaining districts east of Illinois that were represented also agreed to the new figures, except one or two with special conditions which were deferred for further consideration. Only the districts west of Illinois, Iowa, Wyoming, Oklahoma, Colorado and the southwest, which were not represented remain yet to be accounted for and there is no doubt in the minds of the officials that these districts will agree to the price reduction.

### Peabody Approves Figures.

The figures met the approval of Chairman Peabody of the defense councils committee Secretary Lane and Commissioner Fort. In several instances they discussed frankly the situation in certain districts with the representatives from those districts while asking for lower figures and in each instance they met the hearty cooperation of the operators. The prices do not apply to coal for export or for bunkers and of course do not affect contracts or sales made before July 1.

## SEVERAL ALTERATIONS MADE IN CABINET

Athens, June 28.—Several alterations have been made in the Venizelos cabinet. M. Negropoulos assumes the finance portfolio instead of agriculture, as announced yesterday. M. Spirith is now minister of communications instead of M. Papanastasiou, who becomes minister of national economy. The ministers of agriculture and refugees have not been appointed.

## GENERAL ASSEMBLY WILL CONVENE TODAY

To Adjourn Sine Die After Receiving Lowden's Vetoes

Governor Acts on Forty-four Bills, Allowing Many of Them to Become Law Without His Signature—Signs Text Book Bill

SPRINGFIELD, Ill., June 28.—The advance guard of the fiftieth general assembly is arriving here today for the noon session tomorrow when both houses, after receiving Governor Lowden's vetoes, will adjourn sine die.

The governor acted on 44 bills today, allowing many of them to become law without his signature. Among the bills signed was that of Senator Dailey, S. B. 116, regulating the price of text books against which book dealers protested yesterday.

These measures were signed: H. B. 841 (DeYoung)—Defining the term year in the act for the assessment of property to mean a calendar year.

H. B. 218 (Guernsey)—Making it a criminal offense to start an automobile preparatory to using it without the owner's permission.

H. B. 1016 (Smeikal)—Appropriating \$275,000 for relief of the tornado sufferers at Mattoon and Charleston.

H. B. 578 (Meents)—Appropriating \$663,000 as the state's share of the federal post roads appropriation.

H. B. 1039 (Smeikal)—The biennial tax levy bill.

H. B. 703 (Scanlan)—Fixing a penalty for the embezzlement of funds of a corporation.

H. B. 1006 (Bancroft)—Providing that a register of all issues of highway bonds shall be kept in the office of the county clerk.

H. B. 334 (Bancroft)—Providing that townships may turn over to the county any money for the permanent improvement of roads in a county.

H. B. 666 (Dahlberg)—Granting street rights over state land in Chicago.

H. B. 774 (Thomas Curran)—Authorizing cities and villages to sell real estate.

H. B. 775 (Ellis)—Providing that the title to land donated or bequeathed to a school district shall be vested in the directors of the board of education.

H. B. 869 (Frisch)—Appropriating \$225,13 for the state expense of erection of ornamental lights along the streets bordering the state arsenal.

H. B. 1032 (Watson)—Establishing a mining investigation committee.

H. B. 1033 (Watson)—Requiring fire fighting equipment in coal mines.

H. B. 1031 (Watson)—Revising the law in relation to coal mines.

S. B. (Roos)—Directs that the Australian ballot be used in all elections concerning the establishment of township high schools.

H. B. 656 (Committee on education)—Permits the issuance of warrants in anticipation of taxes levied for school purposes and fixes the rate of interest not to exceed five per cent.

H. B. 727 (Committee on judiciary)—Prescribes penalties for making false statements for the purpose of securing credit.

The following bills were permitted to become laws without the governor's signature.

H. B. 647 (Donahue)—Revising the law in relation to firemen's pension in cities under 100,000.

H. B. 753 (Boyd)—Permitting the payment of taxes semi-annually instead of annually.

H. B. 824 (Committee on Judiciary)—Limiting the fees of justices of the peace and police magistrates.

H. B. 734 (Young)—Providing for the sale of state land in South Chicago to the Irigoules Iron company.

H. B. 163 (Thon)—Permitting the erection of public libraries in public parks.

H. B. 951 (Sidney Lyon)—Prohibiting corporations from practicing law.

H. B. 885 (Watson)—Providing for the licensing of all dogs.

H. B. 402 (Sidney Lyon)—Changing the practice in the municipal court of Cook county in relation to bail.

H. B. 302 (Hamlin)—Revising and making uniform the law in relation to partnership.

H. B. 637 (Pace)—Legalizing township or road district bonds.

H. B. 755 (Donahue)—Permitting cities to abandon the commission form of government after two years, instead of three as now provided.

H. B. 293 (DeYoung)—Making uniform the law of transfer of stock of corporations.

H. B. 303 (Hamlin)—Making uniform the law relating to limited partnership.

H. B. 361 (Perkins)—Requires local registrants of vital statistics to deposit statistics with county clerks on the tenth day of each month, instead of annually.

H. B. 392 (Holladay)—Making provisions for the education of blind children.

H. B. 948 (Walz)—Gives subcontractors a lien against moneys of the state against which no voucher or other evidence has been issued and delivered to the contractor by the state.

H. B. 561 (Rough)—Providing that special masters in chancery shall receive such compensation as is fixed by the court.

H. B. 800 (WeSt)—Providing for a charge of school elections in cities and towns having a population of less than 35,000.

(Continued on Page 5.)

## U-BOATS EQUIPPED WITH WIRE-CUTTING DEVICE

BASE OF THE AMERICAN FLOTTA in British Waters, June 28.—By the Associated Press—The captain of a torpedoed merchantman has turned over to the naval authorities here a sketch of a new type of German submarine equipped with a wire-cutting device designed to release it from nets. The sketch shows several strands of stout steel hawsers stretched from the bow thru the coning tower to the stern. Attached to these is a series of heavy circular knives, a foot in diameter and placed about a yard apart.

The captain made the drawing while in the small boat after his ship had been torpedoed. He had been shelled and torpedoed in two other ships but on neither of those occasions had he noticed anything new in the type of the German diving boats.

While he was not close enough to the last submarine to examine minutely the addition to its upper works he was able to see plainly enough to make a good sketch.

## ADOPT NEW SYSTEM TO DESIGNATE REGIMENTS

Decide On Step to Simplify Official Records

All Regiments Will Hereafter be Designated by Number and Service Branch Only Without Distinction Between Units of Regulars.

WASHINGTON, June 28.—Designation of all army regiments hereafter by number and service branch only without distinction between units of the regulars, national guard and national army has been decided on by the war department to simplify official records of the great war forces now being developed.

Under the system the regular regiments will retain their present names from the first infantry, first cavalry, etc., upward. The national guard regiments will be renamed, their numbers beginning where those of the regulars end and the new units to be organized under the draft will take their numbers onward from the last of the guard regiments.

For purposes of local identification, but not in the official records, national guard and national army regiments will be permitted to use in parenthesis after their names the names of the state from which they come. In the case of National guard the former name of the regiment may be used in full in parenthesis, including both the name of the state and the former state number. Thus a national army regiment could be called the "Two Hundred and Fifth Infantry (W. Va.)" or the "Sixty Fifth Field Artillery (Minnesota)" while a national guard regiment might use the designation "Sixty Sixth Infantry (first Indiana)" or "Tenth Engineers (Twenty Second New York)." No parentheses would imply regulars.

Secretary Baker approved the plan on recommendation of Adjutant General McCain endorsed by Major General Bliss acting chief of staff.

## SUMMER DISEASE KILLS SIXTY-EIGHT CHILDREN

ST. LOUIS, Mo., June 28.—Sixty eight children have died from a severe form of summer complaint in two counties in southeastern Missouri during the last few weeks according to information telephoned here today.

More than 200 persons, mostly children, are now ill with the disease and about a fourth of these are in a serious condition. Several persons in middle life have been affected but the victims for the most part are under two years of age. No persons in middle life have died.

The information came here today from Dr. C. M. Harrison, coroner of Dunklin county and Dr. E. S. Tate, coroner of Scott county. Dr. Harrison said the deaths in Dunklin county were due to enterocolitis, an infection of the intestines. Dr. Tate said the disease in Scott county was filicollitis, a summer complaint similar to enterocolitis.

The disease is attributed to abnormal weather conditions in southeastern Missouri—a late cold spring, quickly followed by warm weather, which caused excessive vaporization from the sandy soil. Flies are believed to have been carriers of the disease.

## SAYS AMERICANS WASTE BARN YARD REFUSE

WASHINGTON, June 28.—More than a billion dollars worth of barnyard refuse is wasted in the United States annually, which at this time, is a national tragedy, according to Carl Vrooman, assistant secretary of agriculture, who in a statement issued today urges its conservation as a war measure by American farmers.

"This is the prize waste of champion wastrels of the world, the single preventative economic leak," said Mr. Vrooman.

"The experts of our department have figured that at least half of the animal refuse, all of which is available for fertilizer is lost to agriculture every year.

"At this time such a waste as this is a national tragedy."

## PERSHING LEAVES HOTEL

Paris, June 28.—Major General Pershing, the American commander, has left the hotel in which he has been staying since his arrival in Paris to make his home in a fine old residence in the Rue De Varenne, so as to be near his headquarters. The house, which has a magnificent garden, formerly belonged to Prince Gortchakoff. It was looted before the war by Ogden Mills of New York, who placed it at the disposal of General Pershing.

## WEATHER INDICATIONS AND TEMPERATURES

Illinois—Fair Friday; Saturday fair, probably becoming unsettled by night. Not much change in temperature.

Temperature

The current, maximum and minimum temperatures as recorded Thursday were:

Jacksonville . . . . . 75 83 65

Boston . . . . . 70 80 64

Buffalo . . . . . 66 70 56

New York . . . . . 74 80 66

New Orleans . . . . . 80 84 76

Chicago . . . . . 65 80 58

Detroit . . . . . 66 80 58

Omaha . . . . . 78 80 62

Minneapolis . . . . . 80 82 66

Helena . . . . . 82 88 68

San Francisco . . . . . 58 62 48

Winnipeg . . . . . 84 88 50

## SEEKING SENATORIAL AID.

In a recent effort to hurry up congressional action on the food control bill and other important legislation the president held a conference with five Democratic senators and two Republican senators. Since there is much more vigorous opposition to the president's measures among the Democrats than Republicans it is quite proper that the president had a larger number of Democrats at this conference. The pre-congressional slogan used in so many congressional districts, to "stand by the president" by electing a Democratic member, is not working out in a satisfactory way.

## QUESTION THOMPSON'S PATRIOTISM.

The big national Red Cross fund has been subscribed but Illinois has not done its part. That is the condition because Chicago is about three million dollars short of its allotment. Some of the downstate papers in commenting upon this fact give Mayor Thompson's influence as the cause. It is not surprising since so many sins of commission and of omission are laid at the mayor's door. Then, too, there are good grounds for the charge when recollection comes of the unwillingness of the mayor to invite the French commission to Chicago and his various statements that the U. S. should never have gone into the war. So it is not at all unreasonable to believe that "Big Bill's" influence has been against the Red Cross campaign, or at least has been withheld as an aid. It is unfortunate indeed, that the great city of Chicago at this time has a mayor whose patriotism can justly be questioned.

## A TIME FOR SELF CONTROL.

(Milwaukee Journal)  
Now more than ever it is necessary to learn self-control. It is not well to be swayed by every sort of rumor that floats. In times of excitement some foolish and thoughtless persons misconstrue what they hear. Imagine many things they can have no means of knowing, and are ready to repeat the most impossible of statements with even more emphasis than would be given to a true account. The wise man is not moved by these idle and worse than idle rumors. He keeps silence until evidence of reliability is presented. When you don't know keep silence. On such occasions silence is golden. The man who cannot control himself is not a free man. He is the sport of every wind that blows.

He is for something when he has just talked with a man who is for it. He is quite as strongly against it after listening to one who is against it, and will be just as ready to change again under some other person's influence. His opinion is valueless because it is never his own. It is well to think carefully of a subject before expressing an opinion on it. Do not allow yourself to be influenced by specious reasoning, still less by talk in which there is no reason. The more important the subject, the more need of self-control.

## WHISKEY AGAIN THE CAUSE.

Bad whiskey—bootleg whiskey—was the cause of the crime committed in Jacksonville last night. A deputy sheriff and a policeman who were shot will in all probability recover. The wonder and the good fortune is that they were not instantly killed. There is nothing startling about the statement that whiskey caused the crime, for a very large percentage of crimes here and elsewhere are rightly attributed to "old John Barleycorn." The near tragedy, however, does point to the need for greater vigilance on the part of officers in searching out those who break the laws against liquor selling in this dry city. There has been entirely too much talking the past few months about bootlegging in Jacksonville. It is up to the city officers or county officers to put an end to this business if it exists, and if the charges of laxity in law enforcement are unfounded, to furnish the public satisfactory proof. Any whiskey is bad enough but the bootleg kind is worse.

## SCHOOL BOOK CONTROL.

The school book law just signed by Governor Lowden limits the profit that retail book merchants may charge and provides that the publisher must furnish a statement of the prices which are charged the retailer and these prices must be the same in Illinois as in other states. A much more important provision is that school books cannot be changed oftener than once in five years. The trouble with the school book business has not been the excessive profits made by retailers, but that through frequent changes unnecessary expense has been occasioned the parents of school children. It is inconceivable that methods of the teaching of elementary subjects can be so frequently improved that it is necessary to change text books every year or two. In addition, it has been a notorious fact that some book companies have frequently resorted to bribery in their efforts to bring about book changes and thus create a market for their product.

## COAL BARONS YIELD.

Complete details of the arrangements made by the special government committee and the coal operators of the country are not available but dispatches this morning show that a great deal has been accomplished. The operators in various states and districts have agreed to reduce prices materially. The reductions will be much greater in some other states than in Illinois because the prices have been boosted higher.

The greatest benefits are to be found in the fact that the public is

to have assurance that prices are not to be boosted when the winter days come. It has been an open secret that many of the operators were expecting that the winter price of coal from their mines would be \$7 or \$7 a ton at the mine. This with the expense of transportation and retailer's profit added, would have made an exorbitant figure for the consumer.

The announcement just made of this agreement is the first definite good news that has come from all the talk thus far about controlling prices of any necessary commodity. This has been done without resort to law. Happily the coal operators have responded to an appeal to their patriotism, and the appeal was made stronger by Secretary Lane's threat to take over the mines unless something favorable was done by the mine men.

Rippling Rhymes  
By WALT MASON

## Portly Patriotism.

I'm hoping I may serve the state, before the mighty scrap is done; I'm trying to reduce my weight, so I'll be fit to pack a gun. I've cut out fat-producing eats, forsaken all the gourmet's ways; I'm living now on pickled beets, and lose an ounce in seven days. I trot all day around the town—by exercise some weight we lose; I hope to cut my waistline down so I can see my shapely shoes. It gives my soul a bitter wrench, that I am not allowed to sail for France, to fight in moat and trench, because I break the village scale; and I look forward to the day (may heaven speed the happy morn!) when, slim and debonair and gay, I tread on Kaiser William's corn. I cannot understand the chaps who skulk when they are called to fight, who'd shun the greatest of all scraps, the knowing that the cause is right. Oh, it is good to go, I say, (even the some day one may return, with legs and larynx shot away) a nation's gratitude to earn. And so, to shake my weight of lard, I live on beets and potted hay, and do gymnastics in the yard, and weigh myself nine times a day.

## THIS DATE IN HISTORY

June 29, 1841—John Driscoll and his son, William, ringleaders of the "Prairie pirates" of the Rock River Valley, were shot by a band of citizens after a summary trial.

## EXPLOSION SHAKES LOOP

Chicago, June 28.—Refusal of non-union barber shops to close at night was said by Chief of Police Schuetzler to have been the cause back of a dynamite explosion that shook the loop district tonight. It tore down several stores adjoining a barber shop in North Dearborn street, but did not injure any of the occupants of the buildings.

## REFUSE TO COMPLY.

Petrograd, June 28.—The fortress at the garrison of St. Peter and St. Paul refuses to comply with the order of the commission of inquiry to release Major General Seyn, former governor-general of Finland and the deputy governor or to allow the transfer of Mme. Viruhova, patroness of the late mystic Monk Rasputin, to a women's prison owing to illness.

## ARREST SEVERAL PRIESTS

Amsterdam, June 28.—According to the Telegram several priests of the Entourage of Cardinal Mercier, primate of Belgium, were arrested recently and imprisoned in Germany. One of them is Bishop Le-graive of Malines.

Twenty others, the newspaper says have been imprisoned in Belgium. Among this number is Cardinal Mercier's private secretary, who was sentenced to a year in prison for preaching a sermon on Whit Sunday on Christian Charity.

## MANY GERMANS ESCAPE.

Petrograd, June 27.—Newspapers say that more than thirty-five hundred German prisoners and 100 officers, also prisoners, escaped from various parts of Russia through Finland last month. The Finns are said to have given very little help toward recapturing them.

## JUDGE JONES HOLDS SCHOOL LAW INVALID

SPRINGFIELD, Ill., June 28.—The recent law enacted by the general assembly to validate township high school districts formed under the act of 1911, was today held to be invalid by a decision handed down in the circuit court here by Judge Norman L. Jones of Carrollton. Judge Jones gave his decision in passing on the question of the validity of a high school district organized at Williamsville, near this city. He held that the bill designed to validate districts formed under the act of 1911 was not drafted in conformity with the provisions of the constitution of the state. The court held that the measure to amend the general school law as it sought to do under the constitution should have contained a rewritten form of the general school act.

## ROOKIES TAKE UP TRENCH DIGGING

FORT SHERIDAN, Ill., June 28.—Shoe deep in mud and water 2,000 Illinois students took up the work of trench digging where the Michigan and Wisconsin men quit yesterday. After splashing around for an hour in the bewildering system of fortifications that it was their duty to strengthen, the future officers resembled day laborers more than soldiers of Uncle Sam.

The most difficult task confronting them was how to toss water out of a trench with nothing but a little narrow shovel. After the men had made many vain attempts to throw it out the officers in charge pointed out the logical solution—dig a drain ditch.

The fortifications are being constructed on yellow clay and after the all night rain they were full of puddles and the digging was very heavy.

## UMPIRE DALY FORFEITS GAME WITH ROCK ISLAND

QUINCY, Ill., June 28.—Umpire Daly automatically forfeited today's game with Rock Island when he ordered Pitcher Johnson from the game after he had driven all of the pitchers out of the park because of abusive and profane language from the bench. His action was justified under Section 7 of Rule 26, which states that a forfeited game shall be declared.

"If because of the removal of players from the game by the umpire, or for any cause, there be less than nine players on either team."

## CONTINUE PROBE OF GERMAN PLOT

LONDON, June 28.—The Copenhagen correspondent of the Exchange Telegraph Company, reports that the Norwegian police, continuing their investigations of the German plot to destroy Norwegian steamships by means of explosives brought into the country by a courier of the German foreign office, conducted a seven hour examination of Aron Rautenfels who was arrested in connection with the conspiracy, and his assistants. Rautenfels showed great nervousness while undergoing an examination of two hours by the chief of the Norwegian detective force, according to the Special Demokraten of Copenhagen. Rautenfels probably will be handed over to the German authorities on Friday.

The justice committee of the Norwegian Storting has decided to exercise stricter control over foreigners. It is proposed that all foreigners must possess passports and that they be prohibited from settling in certain districts.

## MURDER REMAINS A DEEP MYSTERY

SIoux CITY, Ia., June 28.—The murder of Miss Theola Gerker, 22 years old, of Woonsocket, S. D., was shot late last night, by an unknown person, while going to the home of a friend, remained a deep mystery today. The entire detective force is working on the case but has not yet uncovered a good clue.

One theory advanced is that the girl was shot by a man who was de-ranked. Miss Gerker had only a few friends here and is not known to have had any enemies here.

## ELLIOTT GOES TO NORTHERN PACIFIC

New York, June 28.—It was understood in railroad circles here today that Howard Elliott, until recently the president of the New York, New Haven and Hartford railroad company, has been elected a member of the board of directors and of the executive committee of the Northern Pacific railroad company, of which he was president from 1903 to 1913.

## UNVEIL STATUE OF EMMET.

Washington, June 28.—A bronze statue of Robert Emmet, Irish martyr patriot, was unveiled today in the rotunda of the National Museum here in the presence of a notable gathering. The memorial was presented to the government by American citizens of Irish descent.

## FUNERAL NOTICE

The funeral of the late N. M. Kennedy will be held Saturday afternoon at 1 o'clock at the home of Dr. J. J. Ogram, 1106 West Lafayette avenue. Interment will be in Arcadia cemetery.

## ARREST THREE WOMEN

Copenhagen, June 28.—The arrest of three men and three women, all German speaking, for espionage is reported in the press.

## SENTENCE SWIMMER

Newark, N. J., June 28.—Adolph Swimer, convicted in May of being threatened to kill President Wilson, was sentenced today to one year and one day in the federal penitentiary at Atlanta. He was a farm hand.

## ONE ITALIAN STEAMER SUNK

Rome, Wednesday, June 27.—The weekly statement of shipping losses shows that only one Italian steamship was sunk in the week ended June 24. Arrivals at Italian ports were 583 and departures 536.

## MISS SUE M. FOX WEDS L. T. POTTER

Well Known Young People Married Tuesday Evening in Pretty Ceremony at Home of Mr. and Mrs. F. W. Bristow—The Matrimonial Record.

A marriage service of pleasing simplicity and rare beauty was solemnized Thursday evening at 8 o'clock at the home of Mr. and Mrs. F. W. Bristow, 834 West North street, when Miss Sue Myrtle Fox, a sister of Mrs. Bristow, became the bride of Mr. LeRoy Talmadge Potter, the son of Mrs. E. A. Potter and one of Jacksonville's prominent young business men. The ceremony was said by the Rev. F. B. Madden, pastor of Grace M. E. church, in the presence of the members of the two families and immediate friends.

The bride is the daughter of Mr. and Mrs. J. G. Fox, 225 Caldwell street, and was born and reared in Virginia. Mr. Fox, her father, was for a number of weeks been ill and it was on this account that the ceremony was solemnized at the sister's home. After graduation from Virginia high school she studied music and expression at Illinois Woman's college. She was graduated from the latter department, and of recent years has become known as a speaker and reader of ability. Mr. and Mrs. Potter will receive good wishes in full measure as both stand high in the regard of many friends.

As manager of the Jacksonville Creamery Co., Mr. Potter has established a reputation for integrity and thoroughgoing business acumen. He was reared in Jacksonville, receiving his education here and later taking graduate courses at the University of Illinois.

Preceding the ceremony there was carried out a pleasing musical program. Miss Annabel Crum of Liberty gave a piano solo and Miss Cornelia LaRue played an instrumental number. Just before the wedding party entered Mrs. C. F. Ehnie sang "I Love You Truly" and "Beauty's Eyes." The wedding march and the recessional were played by Mrs. Homer Potter, who played softly as the pastor spoke the words which united the young people, using the ring service of the Methodist Episcopal church. Helen Frances Bristow was ring bearer and Beaumont Potter, son of Mr. and Mrs. Homer Potter, was page, carrying a staff of pretty white lilies.

The ceremony was performed as the couple stood beneath a bower of palms and ferns, with a love knot of white satin in the center and streamers of white connecting this canopy with a beautiful embankment of ferns and lilies. In the reception room red and white were the colors employed and pink and white were the colors in the dining room.

The bride wore white satin, trimmed with pearls and lace and a bridal veil, caught up with sweet peas. Her bouquet was formed of white roses and pease and was tied with tulle. The bride's bouquet was caught by Miss Verna Smith. The luncheon which was served just after the ceremony was made doubly merry by the cutting of a large wedding cake. The Colonial Inn catered. Many beautiful presents were received by the couple, giving ample testimony of the high place accorded both by appreciative friends.

Mr. and Mrs. Potter left later in the evening for Chicago and from there will go to Wisconsin. They will enjoy a trip of several weeks and after Aug. 1, will be at home to friends in Jacksonville. They will reside at 138 Park street.

McHatten-Anderson.  
The marriage of Charles A. McHatten and Miss Mary M. Anderson was solemnized Thursday morning at 7 o'clock at the Church of Our Savior, the Rev. F. F. Fornaz, officiating. The couple were attended by Miss Katherine Nee of Chicago and Leo Zarnen of Chicago.

The bride wore a suit of gray taffeta and the bridesmaid was attired in blue taffeta. Both carried pink roses. After the ceremony a wedding breakfast was served at the Atlantic cafe and Mr. and Mrs. McHatten left for a wedding trip to Chicago and Aurora. Frank McHatten of Terre Haute, Ind., a brother of the groom, was present to attend the ceremony.

Mrs. McHatten is the daughter of Mr. and Mrs. J. M. Anderson of Charderville and has been a Jacksonville resident for several years. She received her education in the Charderville high school and in the business college at Macomb. The groom is the son of Mrs. Charles McHatten, 317 Sharp street, and after completing his schooling has had employment with Schaefer's grocery store, establishing there a reputation for industry and solid business ability.

Huber-English.  
A quiet home wedding took place at eight o'clock last evening at the residence of Mr. and Mrs. S. W. Nichols, 717 West College street, when their daughter, Miss Margaret S. N. English became the wife of Wm. H. P. Huber. The ceremony was impressively performed by Rev. A. B. Morey, D. D., a life long friend and for the most of her life pastor of the bride. Rev. R. B. Wilson was also present and offered a fervent prayer for the blessing of heaven on the young people beginning the journey of life together.

The bride wore a gown of white net with tulle veil, carried bride's roses. At the close of the ceremony many congratulations were tendered the young people.

The house was tastefully decorated with beautiful flowers and foliage and was very attractive. At the close of the ceremony refreshments were served.

Mr. Huber is a resident of Lafayette, Ohio, and attended the public schools of that vicinity. He is a graduate of Ohio Northern University, has also taken a course in the University of Chicago and done work in the Illinois University. He has

## EDWARD. D. HEJNL

for some years been an acceptable teacher in the Jacksonville high school and has been appointed to that position for another year. He is a young gentleman of excellent character and high standing among all who know him.

The bride is a resident of Jacksonville where her entire life has been spent except when traveling in this country and Europe. She is a graduate of the Jacksonville high school and has studied in the state normal school at Normal. For a number of years she has been a successful teacher in the public schools, first ward, of this city and was appointed for another year at an increased salary but decided to take a school of one instead.

Last evening Mr. and Mrs. Huber departed for a journey among the northern resorts after which they will go to the home of Mr. Huber in Ohio and return to this city by automobile and will go at once to housekeeping. A number of handsome presents were received by the young people.

Those present from a distance were Mr. and Mrs. Charles Lewis of Springfield and family and Mr. and Mrs. Thomas Beah of Decatur.

Kratz-McLain.  
Royal Kratz and Miss Sue McLain, both of Mercedonia, were married Thursday morning at 9 o'clock by Rev. M. L. Pontius, pastor of Central Christian church, at his residence on West College avenue. Both young people have a wide circle of friends who will extend congratulations.

Immediately after the ceremony Mr. and Mrs. Kratz left for Bowling Green, Mo., where they will make their home.

## CATTLE BRING HIGH PRICE

Quincy, Ill., June 28.—At the Harris Brothers' sale today of pure bred Herefords cattle at Harris, Mo., in the last two days, 334 head of cattle were sold for \$412,384. Repeater Seventh sold for \$27,500 and Gay Lad Sixteenth brought \$20,000.

## MAKE NEW FLYING RECORD

Newport News, Va., June 28.—What is believed to be a new army flying record was established yesterday when Captain John C. P. Bartholomew, Lieutenant Stevens, of the government's aeronautical experiment station at Hampton Roads flew from there to Mineola, Long Island, in four hours and 15 minutes. The trip was made without mishap.

## LIGHTNING DESTROYS BUILDING

Tuscola, Ill., June 28.—The old college building at Westfield, Clark county, was struck by lightning last night and was destroyed by the fire which followed. The building was used as a high school and the chapel by the United Brethren church.

but no severe wind or serious damage in any way.

Harold Zachary of the east part of the county was able to visit the city yesterday. He is the young man who suffered a broken leg some weeks ago and while lame from the accident he is getting along very well.

Mr. and Mrs. G. B. Andre and daughter Gladys and Denham Harney left yesterday in Mr. Andre's Haynes car for an extended tour eastward. Springfield was their first objective point and then they meant to visit Danville, Cleveland, Ohio, and Niagara Falls before returning home, taking in Grand Rapids, Mich., on their way back.

WOMEN IN THE NEWS

Miss Grace Cassette of Chicago, an artist and well known resident of the Latin Quarter, Paris, has been decorated with the cross of the Legion of Honor by the French government for services in the French hospital organizations. She invented appliances for the treatment of difficult fractures which have since been generally adopted in all the military hospitals of France.

Professor Grace G. Denny of the University of Washington and economic expert, is authority for the statement that at present is cheaper than wool in Europe, being far less in demand. One-third of the wool supply of the world is used today for the uniforms of the men at the front, while the women of the warring countries are dressing in far simpler fashion than in normal times. If the women of the United States suddenly refused to buy silk, the silk industry would immediately face disaster.

A conference of the many national and state women's war relief societies and patriotic societies will take place today in New York under the presidency of Mrs. William Grant Brown, New York state chairman of the women's committee of the Council of National Defense. Special study will be made of what is needed to make life happier for the men in the mobilization camp. Some ninety heads of organizations nationwide in scope, will be present at the conference.

One of the features of the recent graduation exercises at Mt. Holyoke College, South Hadley, Mass., was the presence of two bright and lively young ladies who were graduated from the old seminary in 1847. One, Mrs. Francis Chamberlain, came from the neighboring town of Medford, Mass. but the other Mrs. James Blaisdell, had crossed the country unattended coming from Claremont, California. Mrs. Blaisdell, when asked to address the graduates, made a few smiling remarks and then added: "I must stop now, for a young man is waiting to take me for an auto ride."

Get your Panama, \$3.50 and \$5.00 at TOMLINSON'S.

OBITUARY SKETCH OF SAMUEL S. HEADEN

The body of Samuel Stanford Headen, who died in Paragould, Ark., was brought to Winchester for burial, being taken from the train to the home of Mrs. M. E. Coultas, sister of the deceased. The burial service was held Monday afternoon at 2 o'clock at Kincaid cemetery. Rev. G. E. Prewitt, pastor of Winchester Christian church, having charge of the service, which the brief were impressive and consoling. The music was furnished by Mr. and Mrs. Prewitt, Mrs. Harry Stewart, Miss Olive Wells and Miss Kathryn Bregle. The flowers were cared for by Mrs. George Chrisman and Miss Ruth Coultas. The bearers were Bert, Gabe and Allen Chrisman, Oliver and Harry Coultas and Fred Killam.

Samuel Stanford Headen passed away at the home of his daughter, Mrs. H. H. Voden, at Paragould, Ark., on Friday, June 22nd, 1917, at 6:45 p. m. He was born at Lynumville, Ill., March 26, 1843, and was the son of Dr. T. C. Headen and Margaret Moore Headen. He was married Oct. 15, 1867, to Margaret Ann Haxby of Scott county who passed away Feb. 16, 1909. He was also preceded in death by two daughters, Leila Perces and Bertha. He is survived by three children, two daughters, Mrs. H. H. Voden of Paragould, Ark., and Mrs. Thomas S. Headen of St. Louis, Mo., and one son, Frank H. Headen of East St. Louis, Ill. One granddaughter, Ruth G. Voden, and three grandsons, Robert, Frank, Jr., and Lange Headen. Three sisters, Mrs. Margaret E. Coultas, Winchester; Mrs. Harriet Chrisman, Merritt, and Mrs. Mary Delapp, No. Pomona, Cal. Two brothers, Brantly Headen and D. Headen of La Harpe, Ill.

Mr. Headen was a kind, loving father and a true brother and friend. He had been in poor health for several years, but was confined to his bed but a few days with congestion of the bowels. Through all his sickness he was ever patient and always thoughtful of those around him.

CARD OF THANKS

In this manner the children of the late Samuel Stanford Headen desire to extend their sincere thanks and appreciation to relatives and friends for the many kindnesses shown us. To them our thoughts will ever turn with gratitude.

Blanche Voden Headen, Daisy Headen, Frank H. Headen.

Wayne F. Gibbs, of the Railway & Light Co. office, has returned from a brief Murrayville visit.

## FROM THE EDUCATOR'S NOTEBOOK

Capt. Robert Duponey of the French army, secretary of the Allied scientific commission in this country co-operating with American experts in war preparation, is well known to many American educators and a former colleague of many of them. He has spent several years in this country. He was professor of romance languages in California for several years, and has been exchange professor at Harvard and at the University of Pennsylvania. Before the outbreak of the war he was professor of literature in a Paris lycee. He is a distinguished linguist, his knowledge of English having led to his choice for the secretaryship of the scientific mission.

The French classes in the West High School at Minneapolis broke all records for scholarship during the year just closed because of the incentive given by correspondence with French soldiers in the trenches. The students adopted poems and wrote them assiduously and received enthusiastic answers which showed developed zeal and interest in the study of French among the students, and the French missives from Minneapolis as well as those from the trenches were exhibited with equal pride by the student correspondents.

M. Arnot, distinguished French meteorologist and director of the French Central Meteorological Bureau, seems to have disposed for good of the theory that a great concentration of war may ever since the war began, and he finds, scientifically, that that influence is nil. He shows that the weather of 1916 was less rainy, less stormy, in France, than that of 1915, and less wet, in spite of all the cannonades, than that of 1910. The rainiest months in France since the war began was December, 1915, and that was precisely the month of the greatest military stagnation, without offensives and without intensive defenses. In short, since the war began it has rained more nor less than it did before. There was a dry period running from the years 1900 to 1905, and a period of wetness set in in 1910 which apparently has not yet ceased.

Dr. Marion LeRoy Burton, president of Smith College since 1910, who leaves this institution to assume the presidency of the University of Minnesota July 1, was born in Iowa in 1874, the son of a farmer. He spent his boyhood in Minneapolis, where he attended the public schools and early went to work in a drugstore. He paid his way through Carleton College, taking very high rank in scholarship, graduating in 1900. From 1900 to 1903 he was principal of Windom Institute, Montevideo, Minn. The next four years he spent as a graduate student at Yale University, receiving the degree of Ph. D. in 1907, and having meanwhile been ordained in the Congregational ministry. He next taught theology at Yale, and following upon this for a year filled a pulpit in Brooklyn, N. Y. In April, 1909, he was elected president of Smith. The year 1909-10 he spent in educational investigation in Europe. The past seven years have been given wholly to the administration of Smith, of which he has been a signally successful president. The call from Minnesota was unanimous and the appointment one particularly pleasing to Minneapolis people who had known Dr. Burton as a struggling lad eager for an education and willing to work for it. The salary he will receive is \$10,000 a year.

The French Academy has awarded a prize to Dr. John H. Finley's work, "The French in the Heart of America," written in 1914. Dr. Finley, Commissioner of Education in the State of New York and president of the University of the State of New York, is at present in Paris, having been deputed by the French government to study the French universities and schools in war time, and he is the bearer to French educators of assurance of the sympathies and comradeship of their American co-workers. This is not Dr. Finley's first contact with the French educational world, and he has won his spurs as a successful exchange lecturer at the leading French universities. His courses at Paris were followed by a tour of lectures before the leading faculties of the provinces. Dr. Finley had already been honored by the French government, by the bestowal of the Legion of Honor, for his work, which tells of the service rendered by the first French explorers and rulers on the North American continent, to the cause of civilization in America.

Do your Duty.

The Man with Money has his family protected with money in the Bank.

Take a dollar out of your pocket and look at it. It is YOUR dollar. If you put it in the Bank it will KEEP ON being your dollar and it will invite other dollars each pay day to join it.

Before you know it you will have built a wall of safety around your family to PROTECT them if anything should happen to you.

Squander that Dollar and it will support ANOTHER man's family.

## NAVY LEAGUE PROVIDES CLOTHING FOR MARINES

Men in Expeditionary Force Sent to France Provided with Comforts by Women of Organization — Major General Barnett Expresses Appreciation.

Washington, June 28.—The United States Marines who are going to France will think many times of the kindness of American women in adding to their comfort and health by providing them with extra woolen garments and comfort outfits, says Major General George Barnett, Commandant of Marines, in a letter received today by Mrs. James Carroll Frazer, Chairman of the Comforts Committee of the Navy League.

Every Marine in the expeditionary force has been provided with extra woolen clothing knitted by the women of the Navy League. It was necessary to rush this work thru so rapidly that Colonel C. A. Doyen, in command of the Marine expeditionary regiment, in thanking the League for this service, said that the quickness and efficiency of these volunteer workers seemed to him "little short of a miracle".

Here is Major General Barnett's letter, which is really addressed to each of the Comforts Committee of the Navy League:

Headquarters U. S. Marine Corps Commandant's Office, Washington.

My dear Mrs. Frazer: Let me thank you most sincerely for all you have done towards fur-

nishing 2,800 sweaters needed for the Marines who are going to France with the first expedition. I want you to know that not only I, as Commandant of the Marine Corps, but that all of the officers and men of the Corps very greatly appreciate your efforts and the efforts of those who assisted you in this great work. I am sure that the men who are going will think many times of this great work to add to their comfort and health. Thru you let me acknowledge my thanks to all who assisted you.

If it can possibly be done, I wish very much that you would let me have the names and addresses of the different units that were working with you in making sweaters, so that I may at least send my thanks and appreciation to those units.

I am sure it will add very much to the efficiency of the men at the front to know that so many kind friends at home are ready and willing to work for their comfort.

Very Sincerely yours,  
(Signed) George Barnett,  
Major General, Commandant.

**CIRCUIT JUDGES ASSIGN WORK.** Judicial assignments of Circuit Judges E. S. Smith, Springfield; Norman L. Jones, Carrollton; and Frank W. Burton, Carlinville, for the year 1917-18, has been announced as follows:

Sangamon county—September term, first Monday, Judge Jones; November term, first Monday, Judge Jones; January term, first Monday, Judge Smith; March term, first Monday, Judge Burton; May term, first Monday, Judge Smith.

Macoupin county—September term, third Monday, Judge Burton; January term, fourth Monday, Judge Burton; June term, first Monday, Judge Burton.

Morgan county—November term, second Monday, Judge Smith; February term, first Monday, Judge Burton; May term, second Monday, Judge Jones.

Scott county—October term, fourth Monday, Judge Jones; April term, fourth Monday, Judge Smith.

Greene county—September term, first Monday, Judge Jones; February term, fourth Monday, Judge Jones.

Jersey county—September term, fourth Monday, Judge Jones; March term, third Monday, Judge Smith.

### THE FOURTH OF JULY CELEBRATION

From present appearances there will be much to interest and entertain at Nichols park next Wednesday, the Fourth, and all patriotic citizens should gladly take hold and help make the day a success. Owing to the general conditions prevailing and in deference to the opinions of many the fireworks have been abandoned and now it is up to the people to see that all have a pleasant time. The games for the children, the band concert, the picnic baskets checked free, the swimming and all other features should make up a program that all may enjoy.

Miss Garnet M. Chapman of the Passavant hospital training school is making a visit with relatives and friends in Paris, Ill.

## CHANGES IN UTILITIES COMMISSION RUMORED

Messrs. Funk and Shaw May Be Only Present Members Retained

According to a statement which appears in the Springfield Register, several changes are soon to take place in the state utility commission. According to this report Frank H. Funk and Walter Shaw are the only present members of the commission who will be retained. The Register's article says:

It is stated upon good authority that the personnel of the new state public utilities commission will be as follows: Judge Thomas C. Denney of East St. Louis, republican, chairman; Fred E. Sterling of Rockford, republican, and Frank H. Funk of Bloomington, republican, and Walter H. Shaw of Chicago and Patrick J. Lucey of Streator, democrats.

Judge Denney, who was first assistant attorney general during the term of William H. Stead as attorney general, and who was retained as an assistant attorney general by Patrick J. Lucey and later by Edward J. Brundage, was appointed several weeks ago as chairman of the commission to succeed William L. O'Connell of Chicago, a democrat. Fred E. Sterling of Rockford, who will succeed former Governor Richard Yates of Springfield, is editor of

the Rockford Register-Gazette, one of the leading republican dailies in the state, and is chairman of the republican state central committee. He was appointed several weeks ago. Former State Senator Frank H. Funk of Bloomington, who is retained, was appointed by Governor Dunne four years ago as progressive when that party was the second party in the state. Last year he went back to the republican party. He is a large land owner.

Patrick J. Lucey, who succeeds Judge Owen P. Thompson as one of the two democrats on the commission, was attorney general from 1913 to 1917.

Walter H. Shaw of Chicago, democrat, who is retained, is an expert civil engineer and at the time of his appointment by Governor Dunne four years ago was engineer of the Illinois waterways commission.

### SOME STORM NOTES.

Wednesday night the city and region about were visited by a heavy storm of wind and rain doing some damage and a great deal of good. A good sized soft maple tree in the front yard of W. D. Doying's residence on West College street was split in two and a good part prostrated but fortunately in a manner doing little harm. In other parts of the city many limbs were blown from trees but not to any serious extent as far as reported.

S. T. Zachary and others east of the city said the rain was heavy but the wind was not high and while some grain was prostrated not a great amount of damage was done and the same may be said of persons in the vicinity of Arcadia, Literberry, Orleans, Woodson and different parts.

Directly west of the city the storm was the worst reported. John Sayre residing near Lynnville, says in the low lands wheat and oats are somewhat blown down and a shed was blown over and taken a quarter of a mile, on Oliver Dickerson's place trees and other buildings were more or less damaged.

Oliver Coultas says he is positive he saw a cyclone in the air about 10:30 and so near and distinct was it that he had his family get up and dress ready to take to the cellar in case of need. He is certain it was the upturned haystack shape and it looked ugly enough but it probably considerably remained high enough in the air not to do any serious damage as far as ascertained.

### PERSHING NOT EASILY CAPTURED

Gen. Grant tells in his memoirs how, from his childhood, he never liked to go back. If he had to return to a point he would try to get to it by going around.

Some years ago Gen. Pershing, our delegate to Germany, now in France, was a lieutenant or captain detailed as military instructor at the University of Nebraska, at Lincoln. Among his duties was that of drilling the cadets on the university campus.

One day, during a visit to the capital, I went down to the "U" to see the evolutions of the boys. As I had paid some attention to such things, I was interested in the movements, one especially so. And I wanted to ask the drill-master why he made the movement in that way. So I walked over toward where the future general stood. But when I got there he was not there. He had moved his headquarters to another part of the field. I tried several times to reach him, with the same result, and it dawned upon me that the soldier was not to be captured. The incident shows a characteristic of the man, which his Mexican experience emphasized. He does not permit the other fellow to bother him, and it is to be hoped that the doughty general will keep up this practice in Europe.—E. M.

### WILL SING FROM OPERA HOUSE BUILDING

A unique open air performance is promised this evening when Snyder & Vincent, vaudeville performers, will sing, stationed on the top of the opera house building. The singers have been going from city to city singing in the liberty bond and recruiting campaigns. Their purpose is to increase interest here in Red Cross and recruiting work. The singers have excellent recommendations from numerous cities where they have appeared. "Your Country Needs You" is the principle song on the program.

### WILL GO TO SUMMER HOME

Saturday morning Mr. and Mrs. Edward W. Brown and son Ward plan to start in their car for Waupaca, Wis., where they will spend the summer at their cottage. Mrs. Brown's father, J. P. Smith, will also go to Waupaca shortly, and Mr. and Mrs. Marcy Osborne will spend the month of July there.

### STRUCK THREE TIMES.

Ed. O. Green, residing a few miles east of the city, has been visited by lightning several times but each time the deadly fluid has touched him rather lightly. Wednesday night his barn was struck but aside from ripping off a few boards the lightning did little damage. Tuesday night a tree in his front yard was struck and partly demolished and the affair happened just four years from the time the same tree was struck.

### SUMMER BERRIES

Strawberries are getting scarce and now raspberries are appearing in the market and soon blackberries will be for sale at the groceries and fruit stores.

### A TEXAS WONDER

The Texas Wonder cures kidney and bladder troubles, dissolves gravel, cures diabetes, weak and lame back, rheumatism and irregularities of the kidneys and bladder in both men and women. Regulates bladder trouble in children. If not sold by your druggist, will be sent by mail on receipt of \$1.00. One small bottle is two months' treatment and seldom fails to perfect a cure. Send for sworn testimonials. Dr. E. W. Hall, 2926 Olive St., St. Louis, Mo. Sold by druggists.—Adv.

## FIGHT NARROWS TO PROHIBITION

(Continued from Page 1.)

government at low prices. He said the minimum price fixing provision holds "over the heads of all business and industry a deadly threat," and protested against the exemption of farmers from the hoarding section.

Opposing the "dry" legislation as an injection of a moral issue and not a war measure the senator directed attention to the fact that the effort to impose prohibition on the country has been mixed up with food conservation by congress itself and not by the administration. He declared himself in favor of prohibiting the manufacture of distilled liquors during the war, but thought beer and wines should be permitted. Beer, he said, carried very little alcohol and the closing of the breweries not only would stop the drinking of beer but would deprive the country of \$140,000,000 in revenue, throw more than 100,000 men out of employment and lose all the taxes which come from the approximately \$1,000,000,000 invested in the industry.

### GENERAL ASSEMBLY WILL CONVEY TODAY

(Continued from Page 1.)

H. B. 349 (De Young)—Amends the sanitary district act.  
H. B. 377 (Committee on Elections)—Amends the registration law of Chicago by permitting voters prevented from registering on registration day to register at the office of the election commissioner.

H. B. 341 (Shurtliff)—Permits a direct annual tax for the creation of a public benefit fund.  
H. B. 233 (Hicks)—Regulating cold storage warehouses.

S. B. 481 (Glacklin)—Permits the withdrawal of special assessments levied against property when no bidders appear at the delinquent tax sale.

S. B. 480 (Glacklin)—Companion bill for the above.  
S. B. 199 (Dunlap)—Providing for the consolidation of school districts.

S. B. 440 (Glacklin)—Permits Chicago to advance money to boards of local improvement by ordinance.

S. B. 485 (Glacklin)—Provides for a board of commissioners to fix the value of property for public improvements.

### Social Events

Entertained for Little Daughter  
Mrs. Edward Elmore entertained a company of little folks at her home 502 Goltra avenue Wednesday afternoon in honor of the 5th birthday of her daughter, Mary Elizabeth. The hours were from 5 to 6. Dainty refreshments were served. Mrs. Elmore was assisted by Mrs. Francis Welshman and Mrs. James Miller. Those present were Mary Louise Montgomery, Mary Virginia Welshman, Catherine Doolin, George Miller, Frederick Welshman and James Miller.

### MORTUARY

Fischer  
Mrs. Anton Graef, Mrs. L. F. O'Donnell and Mrs. A. A. Renner yesterday received a telegram announcing the death of their uncle, Albert Fischer, in Ogden, Utah. Mr. Fischer, who was a prominent business man in the western city, has visited Jacksonville several times and is well known by a number of people here. Mr. Fischer was an extensive traveler and on one of his trips to Mexico and South America he was accompanied by Mrs. O'Donnell.

### CORPORAL HALL SEVERELY WOUNDED

PARIS, June 28.—Corporal James Norman Hall, American aviator and member of the Lafayette flying squadron who has been reported killed in an encounter with German airplanes has fortunately escaped death. He is severely wounded, there are hopes of his recovery. Hall was flying over the German lines when attacked by a German bi-plane.

After a hot encounter seven other German machines came to the assistance of the bi-plane and in this unequal fight Hall was shot thru the lung. He managed, however, with great courage and coolness to bring his machine down within the French lines. He feinted just before landing but had strength enough and presence of mind to cut off the gasoline and ease the landing, so that the machine was not destroyed. Hall was picked up and taken to the Soissons hospital where he now is under treatment.

In addition to the wound in the lung he received a cut across the head. The doctors are hopeful of his recovery and the military authorities are deeply interested as Hall is considered one of the most daring members of the Lafayette squadron. He is a son of Mrs. A. W. Hall of Colfax, Iowa.

### SUFFRAGISTS PLAN MORE DEMONSTRATIONS

WASHINGTON, June 28.—Women suffragists plan to continue demonstration before the White House or places where President Wilson may visit, despite the arrest of twenty-five and the jailing of six in the last week. Miss Alice Paul, head of the woman's party, announced today that the campaign would be continued and that hundreds of women had volunteered to come to Washington to help. The police hold to their determination to arrest women attempting to display banners bearing printed appeals to the president on charges of obstructing the sidewalk or promoting disorderly groups.

### FROM MANY CITIES TODAY CAME REQUESTS FOR RESERVATIONS FOR A BREAKFAST.

## ALLIES FIGHT THEIR WAY THRU AVION

CANADIAN HEADQUARTERS IN France, June 28.—Fighting their way forward amid a labyrinth of ruined houses over which the smoke of battle hung densely, the Canadians at sundown tonight were more than half way thru Avion. The attack which was the second in twenty-four hours was made in conjunction with the British troops all of whom reached their objectives.

On the north the hold upon Reservoir Hill was made solely by the gallant advance of the British soldiers, who went forward unchecked despite heavy enemy shelling. The German trenches on the eastern side were occupied within half an hour after the attack began. Throughout the day there had been incessant artillery activity. The Germans kept Coulotte and Lens-Arras road under shrapnel fire thru the afternoon evidently to make difficult the assemblage of troops for a further advance into Avion.

Their former front line on the outskirts of Avion was also hammered with high explosives and considerably damaged. The Canadian guns did much counter-battery work to the east of Lens, where most of the enemy's guns now are located.

### NOTICE

Property owners on all streets where new pavements are to be laid are hereby notified that all water, gas and sewer connections must be made before the pavements are put down. The city council will not permit pavements to be opened later. Connections can now be made without expense for tapping.  
R. L. Pyatt, City Clerk.

### REPORT BIG INCREASE IN FREIGHT HANDLED

WASHINGTON, June 28.—Reports from railroads controlling fifty-one percent of the country's mileage show that the railroad war board's conservation campaign resulted in the transportation over these lines of 3,354,000,000 more ten-miles of freight in April than they carried in the corresponding month of 1916. In announcing this accomplishment tonight the board declared it was equivalent to adding 35,000 miles to the nation's road facilities.

"This result," said Chairman Harrison, "was accomplished with the movement of but 4.3 percent more locomotive miles and five percent more car miles resulting in an increase of 66 tons or 10.4 percent per train and 2.4 tons or ten percent per loading of cars, equivalent to an addition of 126,000 cars to the equipment of the roads reporting."

"The drive the board is making to get railroads and shippers to make every freight car do the work that two did before the war is having telling effect."

\$1.00 straw hats at TOMLINSON'S.

### HARVESTING OF WHEAT WELL UNDER WAY

WASHINGTON, June 28.—Harvesting of the winter wheat crop is well under way in all southern states and good progress is being made in central districts with oats and winter wheat. The winter wheat harvest is about 10 days late in Kansas, eight or more in Tennessee, North Carolina and Virginia and two weeks late in southern Illinois and Indiana. Co-operation between the department of agriculture and labor has been arranged so as to have laborers on the farms where the crops are ready to be harvested.

## WAR NEWS SUMMARIZED

The Canadians men from all parts of the dominion—have taken another hack at the German lines protecting Lens the coal center in the department of Pas de Calais, and have been rewarded with a further encroachment on their objective. Striking on a two mile front south of Lens the Canadians from Nova Scotia, central Ontario, Manitoba and British Columbia protected by effective curtain fires stormed and captured German first line positions before Avon and also the village of Leauvette. They defeated in their onslaughts men of the crack Prussian guard and the fifth grenadier guard whose machine gun and rifle fire and the fact that the attacking force had to cut thru wire entanglements could not stay them.

When the battle ended and the Canadians began their work of consolidating newly won positions their line had been extended to within one mile of the center of Lens, the fall of which under such tenacious assaults as have been made recently seemingly cannot be delayed.

On the remainder of the front in France there have been only bombardments between the French and the Germans. In Belgium the Ger-

mans are carrying out heavy bombardments of French and Belgian positions at numerous points from the sea southward.

In attacks south of St. Georges Germans entered French trenches, but later were ejected from them, suffering heavy casualties. Only minor operations are in progress on the other fronts.

In the Russian theater the fighting is still spirited in Galicia. In the Austro-Italian zone infantry attacks have again ceased for the moment and only artillery duels are taking place. Patrol engagements and artillery continue to feature the fighting in Macedonia.

### DEMAND UNIVERSAL SUFFRAGE

London, June 28.—Budapest dispatches report a great demonstration in Budapest in a demand for universal equal and secret suffrage. Twentyfive thousand persons marched in procession thru the principal streets. There was some rioting and windows were broken and the police had some difficulty in dispersing the crowds.

### PLEDGE MONEY FOR CAMP.

Rockford, Ill., June 28.—One hundred thousand dollars was pledged today by citizens of Rockford to help toward the success of the army camp which is under construction here.

## TORPEDO STEAMER; FIRE ON LIFEBOATS

LONDON, June 28.—The Elder-Dempster steamer Addah was torpedoed without warning and sunk by a German submarine on June 15. The submarine fired on the captain's boat killing eight men.

The submarine fired on the master's boat from a distance of between 300 and 400 yards. The shot took off the boat's stern. Then the submarine continued firing while the men were swimming about.

It also fired on the chief officer's boat which was pierced by a shell but nobody was killed. The several were slightly wounded. All the survivors were picked up by a French steamer on the afternoon of June 16th.

The Addah was a vessel of 4,397 tons gross; built in 1905 at New Castle. She was 350 feet long, 48 feet beam and twenty feet deep.

### THREE UNACCOUNTED FOR.

London, June 27.—The Times understands that three passengers on the Monongahela, two Englishmen and a Parsee, are unaccounted for, and that four British engineers and ten Lascars of the crew are believed to have been killed in the explosion of the mine.

### UNION BAPTIST MISSIONARY SOCIETY MET

Large Number of Members Listened to Interesting Program—Pisgah News Notes

The Ruth Missionary Class of Union Baptist church held their monthly meeting at the home of Mrs. Rachel Bottom, Thursday afternoon June 27. About 5 members were present and a very interesting program rendered. The hostess served refreshments.

The devotional exercises were lead by Miss Doris Allen. A sandwich demonstration was given by the hostess, Mrs. Bottom. Mrs. Bertha Baker gave a profitable talk on the different ways of fixing potatoes. Mrs. Minnie Curry gave the reading "Virginia," written by Lord Macaulay, which was greatly enjoyed.

Miss Esther Sample gave an instructive paper on "Patriotic Women of the Past and Today." The roll call was responded to by the members with interesting talks on "How We Can Show Our Patriotism."

#### Pisgah News Notes

Miss Esther Sample and Hardin Bell spent Sunday at the home of Mr. and Mrs. Roy Dyer, near Murfreesboro.

Mr. and Mrs. M. Harris were Jacksonville visitors Thursday.

Mr. and Mrs. A. E. Curry and Bernice Wood were Jacksonville visitors Wednesday.

Lulu Bell and Ruby Harris visited friends in Franklin Tuesday.

Miss Ethel Whitlock of Franklin is spending the week end with Miss Esther Sample.

Miss Margaret Leal of Chicago is visiting at the home of E. K. Stevenson.

Perry Cowgour of Jacksonville was

transacting business in Pisgah Tuesday.

Mr. and Mrs. G. S. Beekman and C. S. Harris were shoppers in Jacksonville Tuesday.

**FORMER FRANKLIN MAN MARRIED IN CALIFORNIA**

Franklin Times: The Colton, Cal., Courier gives an account of the marriage of Grover Grimsley, well known here, and Miss Florinda del Castillo of that place last week. The paper says:

"The service was a simple one and the only witnesses were the sister and brother-in-law of the bride, Mr. and Mrs. J. del Castillo. A becoming frock of blue was worn by the little Spanish bride for the ceremony. Mr. and Mrs. Grimsley are motoring to the beaches tomorrow to spend a day or two and upon their return will take up their residence in an apartment. At present they are at the del Castillo home. "Mrs. Grimsley comes from a Spanish family famous in this vicinity. As assistant in her brother's store and at the office of the Colton Oil & Implement Co. she has made a large acquaintance.

Grimsley went to California early in the year and is employed as mechanic in a Colton garage.

### RED CROSS MEETING AT WINCHESTER SATURDAY

H. H. Bancroft of Jacksonville Will Be the Speaker—Presbyterian Ladies Give Benefit Social.

Winchester, Ill., June 28.—Preparations are maturing for a Red Cross meeting Saturday evening of record breaking size. H. H. Bancroft of Jacksonville will be speaker of the day and the Winchester ministers will each have a place on the program. Music will be furnished by the Merritt band. The membership campaign has been making good progress, the clock now showing \$1,400 of money collected from memberships.

**Gave Benefit Social.**  
The Ladies of the Presbyterian church, whose birthdays fall within the months of April, May and June, gave a birthday party Wednesday evening at the home of Mr. and Mrs. Henry Higgins. The event was in part a Red Cross benefit and an excellent time was enjoyed by the guests, despite the fact that the stormy weather interfered somewhat with attendance. The Red Cross colors and national flags were used in decoration and the rooms were made beautiful with Red Rambler roses and sweet peas. Ice cream and cake were served.

**Brengle-Davis Wedding.**  
The following from a paper published in a Perry, Okla., paper will be of interest to Scott county people, and especially in the Bluffs vicinity, where the groom at one time resided: "The announcement of the marriage of E. Q. (Quine) Brengle and Miss Letha B. Davis which event took place Sunday, June 3, at Silverdale, Kan., came as a great surprise to many of the friends of the two young people.

"The bride is the daughter of Mr. and Mrs. G. B. Davis, who resided in Perry for a number of years, now residing on their farm nine miles south of Perry.

"The groom is the son of Dr. and Mrs. D. D. Brengle and grew up in Perry. He was a member of the high school graduating class of 1915 and is now in the employ of the City Drug Store. They will go to house-keeping at once in the Maupin cottage at the corner of 8th and G streets.

"Both are worthy and popular young people and have the best wishes of a host of friends who wish them happiness and prosperity as they journey through life."

**Mohair suits \$13.50 at TOMLINSON'S.**

**RED CROSS ROLL SHOWS STEADY INCREASE**

Committee Has Definite Assurance of 7324 Names—Fine Report from Several Precincts.

Red Cross memberships yesterday reached the certain mark of 6,771 and conservative estimates from districts yet to be heard from will make the figures 7,324. Chairman Crabtree and his associates in the organization work are hoping that these figures may yet be somewhat increased so that the desired membership of 7,500 may be secured. The present result is particularly gratifying as the state association allotment for this county was 5,163. Chapin has sent in 264 memberships, Murrayville 300 and Concord 212. Some other especially good reports from country districts have been made and later on further details of memberships will be published.

**G. W. Morton will sell at public sale Saturday, June 30, at 2 o'clock, at Ogles Barn, North Main St., 10 head of fresh milch cows. Extra good ones.**

#### BOUGHT HORSES BY FRAUD

Sheriff Graft received a telephone message from Granite City yesterday asking him to take charge of two horses that had been shipped to Jacksonville over the C. & A. road and if possible to arrest the man who had shipped the animals. It seems that some man, as yet unidentified, purchased the horses and gave a check on the Elliott State bank of this city in payment. The check was returned marked non funds and the shipping company is therefore endeavoring to secure possession of the horses.

#### HAS BROTHER IN FRANCE

Mrs. Edward Walker of Chicago is in the city for a brief visit with Mrs. F. J. Blackburn at her home on West Lafayette avenue. Mrs. Walker, who was Miss Dancey before her marriage, is a former student of the Woman's College. Her brother, Rev. Jesse Dancey of Chicago, who was here to conduct special services during the week of prayer at the Woman's college, is now with the U. S. troops in France, having entered the service as a chaplain.

**Mrs. Vernon Castle, the best known and best dressed woman in the world, in "Patria." Scott's theatre Saturday.**

#### FUNERAL OF MRS. ONKEN TO BE HELD SUNDAY.

The funeral of Mrs. John Onken, who passed away Thursday morning at her home in Chapin, will be held from the residence Sunday afternoon at 1 o'clock. Rev. Mr. Herbert of the Methodist Protestant church will be in charge. Burial will be made in Diamond Grove cemetery, this city.

#### PAYING OBJECTIONS OVERRULED

In the probate court Thursday Judge Thomson heard objections to the proposed paying in the business district. All legal objections were overruled and opportunity was given to file objections as to benefits. These are to be filed by Monday, July 2, and the hearing thereon will be had July 9.

### WHISKY CAUSED GUN ATTACK ON OFFICERS

DEPUTY SHERIFF WANAMAKER AND PATROLMAN BAKER SUFFER WOUNDS

Both Men Painfully Injured But Will Recover—George Price Chief Actor in Near Tragedy Shot When Officers Attempted To Arrest Him For Disturbing the Peace—Father is Also Taken Into Custody.

Crazed by bad whisky George Price went on a rampage Thursday evening and as a result Howard Wannamaker, deputy sheriff, and Frank Baker, city patrolman, are at Our Savior's hospital suffering from gun shot wounds. Price and his father, William Price, were both arrested by the police and are at the city prison.

The shooting took place at the Price home on Duncan street a short distance from North Fayette street. Mr. Wannamaker is the more seriously wounded of the two men as the first shot struck the deputy sheriff in the face and he received the second lead in his breast. Patrolman Baker was shot in the left thigh and the left side of the breast and was slightly wounded in one hand. The injured men were hurried to Our Savior's hospital where Dr. F. A. Norris attended them. The surgeon said last night that while the wounds are very painful that both men will recover. As indicated, the wounds of Mr. Wannamaker are considerably more serious than those of the patrolman.

#### Went On Spree.

It seems that Price, who is a painter by trade, recently had some trouble with his wife, and Thursday morning went on a spree. It is also said that during the morning he visited a hardware store, purchased a box of shells and subsequently told one of his friends that he was going to get some of the Jacksonville police. The father was sitting on the front porch of the residence while the son did the shooting from an upper window. Consequently after the arrest of the younger man Capt. Roach took the father also into custody. It is the claim of the father that he had been trying for hours to quiet his son but had been unable to do so and finally gave up in despair. Officer Baker was the first man shot and it was while Capt. Roach had returned to headquarters for a riot gun that the deputy sheriff received his injuries.

It was about 6:30 o'clock that Officer Baker, who was at the police station, received a telephone call that there was a drunken man on Duncan street who needed attention. The patrolman, not thinking of any danger, jumped into the police patrol car and immediately drove to the house indicated. He saw a man sitting on the front porch and so approached the house that way, and it was as he was walking toward the house that Price fired thru a window. The officer immediately retreated in order to escape further wounds.

#### Went for Riot Gun.

Meanwhile another call was sent to the police department and Capt. Roach responded, taking along the entire night force. Patrolmen Jordan, Moore and Elliott. When they reached the scene they found Officer Baker wounded and could see Price thru the window walking about a room with a shot gun in his hands.

Deputy Sheriff Wannamaker was nearby, sheltered by a tree, and warned Capt. Roach and those with him of the danger. It was then that the captain returned to the police station to secure a riot gun. Meanwhile Deputy Sheriff Wannamaker decided that he could safely approach the house from another side and as he attempted to do so Price lowered a window at the front of the house from the top and shot. The deputy sheriff then took shelter behind the corner of a house further away and from this point fired at the young man with his revolver. He exposed himself, however in taking aim and Price let go another shot, both, as previously indicated, taking effect.

The policemen were stationed at various points about the house and when Capt. Roach returned with the riot gun he found a place in the second story of a house adjoining where he could get a view of Price if the man appeared at the back window. He had been in this position but a short time when a shout went up that Price had run out at the back door of the residence. The man left his shot gun within the house and tried in this way to make his escape.

**Police Overpowered Price.**  
Officer Jordan from a woodshed saw him running and that he was unarmed, and dropping his own gun, started in pursuit and a moment later Price was overpowered, the other patrolmen closing in just as Jordan and Price grappled. Price owes his life to the fact that he ran from the house without a shot gun for had he started to escape still armed undoubtedly Officer Jordan or some other of the patrolmen would have fired.

As the elder Price could give no reasonable account to the officers why he sat on the porch seemingly unconcerned as this shot gun battle progressed, he too was taken into custody and occupies a cell adjoining his son.

The younger Price when seen at the city prison last night by a Journal reporter, was still so much under the influence of whisky that he talked only incoherently. For a time he declared that he had no shot gun and had not used one. Then he raved about bootleg whisky and said that he frequently bought it from a colored woman living on North West street. "Why don't you

arrest 'em?" he raved. "Why don't you arrest 'em when you see them bootlegging? For you would arrest me if you saw me selling it. I can buy whisky for 25c a pint or beer there any time I want it." It was in this vein that the prisoner talked between sobs and tears. But evidently he was in no condition to give any connected story of just what happened or to tell what he had been doing.

#### The Father's Statement.

The father said that he was sixty nine years old and had never been in trouble before. "You don't know what your son may bring you to," he said, "for look where that boy of mine has brought me. I have other children who are honored and respected, but I have had all kinds of trouble with this boy, thru no fault of mine. Bootleg whisky did it, and when he gets to drinking he is half crazy and hasn't any idea of what he is doing. Long before the police came I had struggled with him because he had been shouting and swearing and using loud language which disturbed the neighborhood. I even tried to smother his voice but he is stronger than I am and I was powerless."

There had been trouble, it seems, between the elder Price and his wife Tuesday night and as a result Mrs. Price left her home and went to stay with relatives. Thursday morning she appealed to the police to accompany her to her home as she wished to remove some of her belongings. Desk Sergeant Moran went with Mrs. Price to the residence and without interference on the part of her husband she was permitted to remove the property that she wanted. The police believe that the father and son had both been drinking during the day and that the outbreak Thursday evening was the culmination of two days' troubles.

#### Might Have Been More Serious.

The first reports received of the tragedy indicated that Deputy Sheriff Wannamaker's injuries were so serious that recovery was doubtful and the fear was expressed that the policeman's injuries might also prove dangerous. It was therefore with great relief that the many friends of both Mr. Wannamaker and Mr. Baker heard that the chances were good for their comparatively early recovery. It is fortunate too that none of the other officers were injured as they attempted to quell the disturbance raised by this whisky crazed maniac. Had not Capt. Roach received a warning from Deputy Sheriff Wannamaker he too would probably have been shot.

### RED CROSS PLAN FOR \$25,000 FUND IN DOUBT

Allotment for This County Must Be Raised Now or Later—Committee Will Decide.

Directors of the Red Cross society, together with members of the executive committee and others met last night in the committee room of the Ayers National bank. The meeting was called to consider various matters relative to the affairs of the society and also to confer with a committee of business men relative to Fourth of July celebration.

The question as to what shall be done with reference to raising of the \$25,000 Red Cross fund allotted to this county was discussed at length. As is generally known, the first \$100,000,000 asked for the National Red Cross society has been over-subscribed altho Illinois has not yet raised the \$8,000,000 assigned to this state. It is understood that a second call will soon be made, and after considering the question at some length it was decided to appoint a committee with power to act. This committee includes M. F. Dunlap, E. E. Crabtree and Dr. Carl E. Black, and after making some further investigation, will decide upon the best course to pursue.

The question of taking some part in the Fourth of July celebration in the endeavor to advance the interest of the Red Cross society was also discussed. There is quite a difference of opinion on this question and the matter was referred to a committee including Rev. W. E. Spoons, H. J. Rodgers, Rev. F. A. McCarty, Mrs. John Cleary and Miller Weir. It was suggested that motion pictures might be used in connection with the Fourth of July celebration, of a kind that would educate the people in the work of the Red Cross society. The whole matter, however, was finally left with the committee named.

Another committee appointed includes Dr. F. A. McCarty, Miller Weir and E. E. Crabtree. These gentlemen will draft a letter or resolution expressing the appreciation of the Red Cross directors for the earnest work done by scores of people in various lines of activity which made possible the success of the campaign for members.

The directors decided last night to encourage the formation of branches and auxiliaries in communities desiring to work in this way.

**Mrs. Vernon Castle, the best known and best dressed woman in the world, in "Patria." Scott's theatre Saturday.**

Mrs. Preston Wood and Miss Catherine Wood have gone to Michigan to spend the summer. They will be at Miss Wood's fruit farm near Frankfort.

### MRS. SALLIE F. SNYDER DIES THURSDAY NIGHT

End Came at Home of Mrs. L. F. Randall, a Daughter, After One Week of Illness.

Mrs. Sallie F. Snyder passed away Thursday evening at 9:50 o'clock at the home of her daughter, Mrs. L. F. Randall, 322 South East street. The end came after an illness of a week's duration. Mrs. Snyder, whose many good qualities of heart and character have given her a place of warm regard in the hearts of friends and neighbors, was one of Jacksonville's well known and highly respected women and her loss will on that account be the harder to bear. Her maiden name was Sallie Sanderz and she was united in marriage to Wesley Snyder, who preceded her in death.

Four children survive Mrs. Snyder. They are Gilbert Snyder, Miss Nellie Snyder and Mrs. L. F. Randall, this city, and Edward Snyder, residing in Florida.

The announcement of the funeral of Mrs. Snyder will be made at a later time.

**NOTICE**  
N. J. Goss is in the employ of this company and is authorized to take subscriptions, make collections and advertising contracts. Mr. Goss has been in the employ of this company for more than a year.

**JACKSONVILLE JOURNAL COMPANY**

#### FEWER EMPLOYEES AT SCHOOL FOR BLIND

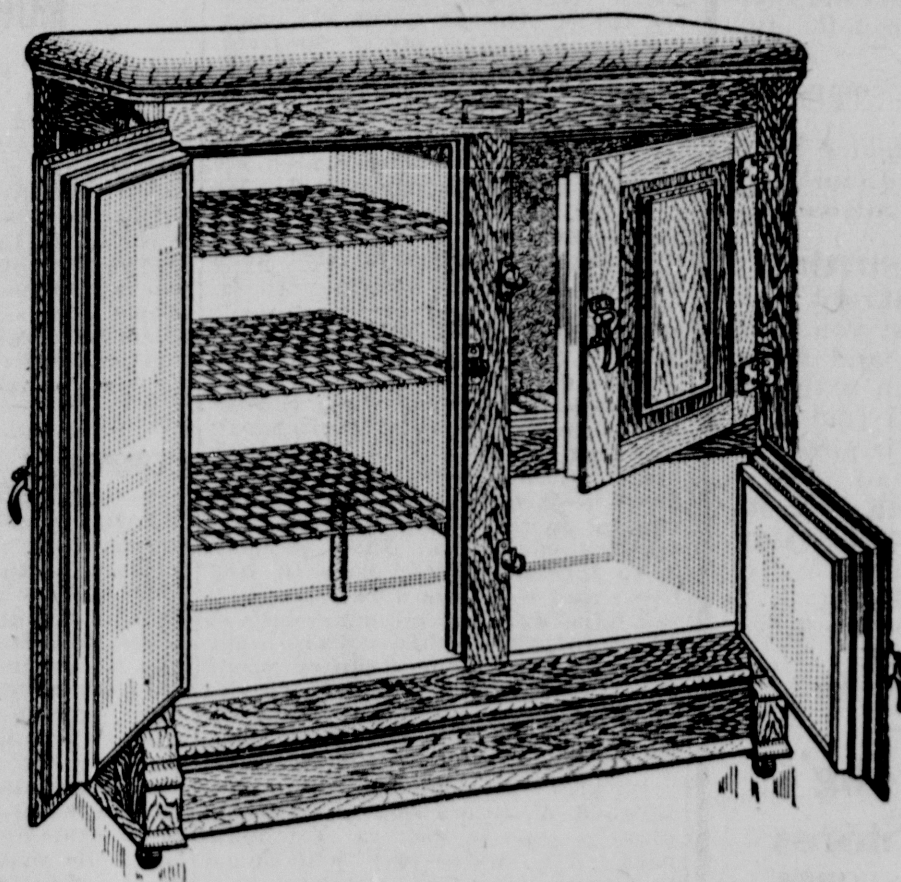

Supt. Montgomery of the School for the Blind has received an order from the state board of administration whereby twelve employees are released from duty for the summer months. A number of these employees have already left as they were entitled to the final week of June as a vacation. Others will leave Saturday, June 30. Most of those who leave the service for the summer period are employed in the domestic department. During this vacation period eight pupils of the school are being housed there as they have not suitable home surroundings. This plan has been followed by Mr. Montgomery with the approval of the board of administration since he has been serving as superintendent. Nearly all of the pupils go to their homes for the summer months.

#### FRANKLIN REBEKAHS.

At a recent meeting of the Franklin Rebekah lodge officers were chosen for the ensuing term as follows:

Noble Grand—Mrs. Sallie Wyatt.  
Vice grand—Miss Grace Hill.  
Recording secretary—Mrs. Enfa Bland.

## FACTS OF INTEREST IN GERMAN YEAR BOOK

Sidelights on War-Time Newspaper Work Given in 1917 Volume—Circulation of Many Papers Heavily Reduced—Identical Stereotype Matter Published in Third of Newspapers.

Copenhagen, Denmark, June 28.—The German Press Year Book for 1917 throws interesting sidelights on war-time newspaper work. It shows that there are 562 fewer news-

papers in Germany today than in 1914. Of the 2,938 still appearing, many which three years ago employed four editorial writers, are now conducted in both their business and editorial departments by the proprietor himself.

The circulation of hundreds of papers has been heavily reduced. Sixty-three papers are eking out a war-time existence on a circulation of 500 copies per day, and there is one paper with only 150 subscribers. The largest daily circulation is said to be 270,000.

Only 805 papers have increased their subscription price, but in no case to exceed 30 per cent, and these are issued at 50 cents to 60 cents per month, including in most cases both morning and evening as well as Sunday editions.

About one-third of all German newspapers now publish identical stereotype matter supplied by agencies in the larger towns. This syndicate literature consists to a large extent of the material issued by the government.

### GERMANS STRIP ART MUSEUM.

Hazebrouck, France, June 28.—Abbe Lemire, mayor of Hazebrouck and deputy from the department of the north, has learned from a reliable source that the Germans are stripping the interesting Lille Museum of such objects of art as previously had not been sent to Germany. The Germans, it is learned from the same source, posted placards about the city exhorting the inhabitants to subscribe to the latest German war loan. No French people subscribed so far as known.

### INCREASED INTEREST IN SKIING

Stockholm, June 28.—The increasing interest in skiing in Sweden the past winter is evidenced by the fact that more than 6,000 "skier's medals" were granted, as against 1,500 for the preceding winter. To win this medal the skier is required to cover 18 1-3 miles in three hours and fifteen minutes and 36 2-3 miles in six hours and forty-five minutes. A great number of the medals went to the army, and the winners covered every grade from colonel down to private.

### STUDIES TRANSPORTATION PROBLEMS

Shanghai, June 28.—Paul Page Whitman, of Seattle, is in China making an investigation of transportation facilities, for the United States department of commerce. Mr. Whitman will visit all Chinese ports and make a study of the conditions on navigable streams. He will also study Chinese railways and projected railways, as well as interior trade routes.

### DECREASE IN NUMBER OF RACE HORSES

Dublin, Ireland, June 28.—The effect of the war on the breeding of race horses is shown by the fact that the number of horses in training or being prepared for racing in Ireland has been reduced since the first of the year from 1,100 to 540. The number will be still further reduced through the restrictions on feed-stuffs.

### \$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Medicine is taken internally and acts thru the Blood on the Mucous Surfaces of the System thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Medicine that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address P. J. CHENEY & CO., Toledo, Ohio. Sold by all Druggists, Etc.

## PURPOSE OF COMMISSION TO RUSSIA DEFINED

Railroad and Technical Experts to Aid Country in Solution of Problems of Communication—Will Place Knowledge of Railroad Practices Existing in America at Disposal of Russians.

Tokio, June 28.—(Correspondence)—When the American commission of railroad and technical experts, bound for Russia to aid that country in the solution of problems of communication, arrived in Japan from the United States it was met at Yokohama by Lt. Post Wheeler, the American Charge d'Affaires, J. H. Geary, President of the American Association of Japan, and Baron Renne, secretary of the Russian embassy at Tokio.

On its arrival the commission gave out a statement defining its purposes saying: "The Advisory Commission of Railroad Men has but one aim and object in its mission to the Russian people, and that is to render them the greatest possible service in their war against what has now become a common enemy."

"It is, and has been, the conviction of the American government that its first duty was to place at the disposal of the allied powers whose interests and aims have now become the interests and aims of the American people, every available form of encouragement or assistance, material, financial, economic and military, that lies within its power, to secure for civilization the extension and perpetuation of the great idea of democracy, the vindication of which has now become the issue upon which the war is being fought."

"It is clear that some little time must elapse before American material aid can be a dominant factor in Europe. It is the wish of the American government to learn at first hand how it may serve at the earliest moment the needs of its allies. As the war has progressed the Entente powers have been drawn closer and closer together, each giving to the other that in which it excelled, and taking from the other that in which it was deficient. We in America have not the experience in modern warfare that even the smallest of our allies can now claim, but we believe that in problems of railroading and transportation our practice compares favorably with the highest developments known abroad."

"The American Railroad commission goes to Russia with no preconceived idea of how it may best serve its new sister in democracy. It goes only to place its knowledge of railroad practices which exist in America unreservedly at the disposal of the Russian people to use or reject as their judgment may dictate. There is no man connected with the mission who has any commercial or financial aims whatsoever, and the commission is interested only in placing its knowledge and experience at the disposal of Russia, if the government of Russia can in any way make use of them."

### MONEY

I have \$12,000 to place on good security. Would like to place it this week. Also have a place for \$500.00. F. L. Hairgrove.

### CORN AND CHEESE: A SUBSTITUTE FOR MACARONI-CHEESE.

Washington, D. C. June —Corn may be used with cheese in place of macaroni, specialists of the United States Department of Agriculture point out, for the preparation of a delicious and nutritive combination dish. The following recipe has been worked out by the Department specialists:

1 cup of samp (coarsely ground or cracked corn).  
1 quart of water.  
1 1/4 teaspoons salt.  
Boil the samp in the salted water until tender. Drain and combine with the following sauce:  
1 cup skim milk.  
1 cup finely cut cheese.  
2 tablespoons flour.  
1 teaspoon salt, 1/4 teaspoon mustard, paprika, or other seasoning.  
Mix the seasonings with the dry flour. Add enough milk to form into a smooth paste. Add the remainder of the milk and heat in a stewpan, stirring constantly until thick. Add the cheese and stir until it is thoroughly melted.

Put a layer of the boiled samp in a baking dish or casserole. Add a layer of sauce and so on alternately until the material is all used. Sprinkle bread crumbs over the top layer of sauce and cook in a medium oven until the crumbs brown.

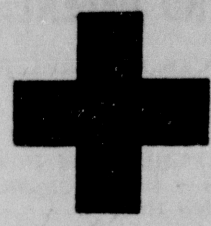

Lye hominy or hulled corn (to give it both its southern and its northern name) may be used in place of coarse cracked corn in the preparation of this dish. If this product is used, it is unnecessary to heat it until it is placed in the oven.

A richer sauce may be made, if desired as follows:  
2 teaspoons butter.  
2 tablespoons flour.  
1 cup of milk.  
1 cup finely cut cheese.  
1 teaspoon salt.  
1/4 teaspoon mustard, pepper, or paprika.

Melt the butter in a saucepan. Mix into it the flour and seasonings. Add the milk and heat, stirring constantly until the sauce becomes thick and smooth. Add the cheese and stir until it is melted.

### "WAR" WOMEN IN CONFERENCE.

New York, June 28.—Representatives of the many national and state women's war relief societies and patriotic organizations met in conference in this city today in response to a call issued by Mrs. William G. Brown, New York State chairman of the women's committee of the Council of National Defense. The purpose of the conference is to bring about a closer co-operation among the various societies and to prevent the overlapping of their separate activities.

### GLORY GILDS BACHELOR. AT LAST HIS MISSION NOBLEST.

By Jack Lait.

The bachelor is "in" at last. For decades it has been the fashion to twist him, to tax him, to jibe him with his domestic slackerism, to ask him to hold the moist babies of the more dutiful benedicts and to hold him before the scorn of Theodore Roosevelt and the other half of the nation.

But, now! In solemn proclamation at a critical moment, President Wilson singles out the single men and addresses them as honored, select, chosen citizens, bearers of a sacred banner, soldiers of a mighty cause. "Unmarried men between the ages of 18 and 40" are the ones to whom Mr. Wilson intrusts the most vital mission in the history of the Stars and Stripes, the work of conquering the Kaiser and of planting freedom over the universe.

He asks for 70,000 to be raised at once, able-bodied and able-hearted men who can plug the gaps in our regular Army, the first to be sent across seas where the greatest adventure of all times beckons.

He chooses well. Thru all the ages it has been the function of the unhampered, the carefree blade without wife or babies clinging to him, looking to him, crying to him, to shoulder the weapons of warfare and to venture his life—the life that belongs to him and to his country alone—in honorable battle.

What good does it serve that a man should go on the line and leave behind him a woman and little ones to burden the land that is already straining with its maintenance of the men in the field? It is small favor to America to serve in its ranks at the front and leave a half dozen desolate and destitute in the rear.

But the man without such responsibilities goes clear and comes clean. It is the spirit of adventure, wise men have said, that makes many a man remain a bachelor. Marrying is, after all, a conventional thing. It has its sweet fruits, but there can be no denying that it chains a man, forces him to be cautious, binds his wings and dilutes with cares the liquor of his free abandon.

Many a man does not marry until he is resigned to set his ways and move along slow, orderly, calculated steady steps.

But he who is wifeless and childless, he is untrammelled. He may follow the whims of pleasure or the stern, glad call of more noble exhilarations.

And of them what could be more magnificent, more blood bubbling, more entirely fascinating than this bugle blast to arms in the greatest fight of all times, the greatest game mankind has ever played, the contest

for the championship of the world!

This is the bachelor's inning. Today his nation looks into his eyes, seeking there the twinkling answer of the brave man who, without injustice to any undefended ones and will go to defend the wives and children of his countrymen.

The women and children first. It has been the cry and the slogan of gallant men since manhood bloomed within the hairy breast of the first brave human.

And the unmarried man between 18 and 40 has now the duty and the privilege, the honor and the obligation to answer "Here!" for the women and the children, the wards of the Stars and Stripes.

It is his chance to fight for the flag in the field in France. The army needs him. And he can go in the knowledge that he deprives no one while he battles for them all. It is a glorious opportunity. Embrace it today! Go to the nearest recruiting station and enlist!

### WARNING

All persons are warned against the premature celebration of the Fourth of July by discharging firearms, fireworks or fire crackers of any description in the city before the fourth day of July. Violators of the ordinance will be arrested and prosecuted.

George P. Davis, Chief of Police.

### DEVISE TRADE PATENTS SYSTEM

Paris, June — The defense committee of the Paris dressmaking industry has devised a system of "trade patents" to be issued by the committee for the protection of American buyers against the copying of styles bought in Paris.

The "patent" or certificate will be given to the buyer to prove to his customers that the style shown was really made and bought in Paris. The buyer will be authorized to reproduce the styles bought or to loan them.

Each buyer will acquire the right to sell copies of the style and will receive a coupon book from which he may deliver to buyers of copies a document certifying that the dress is a copy of a style produced in Paris.

Each copy sold to private trade will be authenticated by a special label representing the original label of the house that created the style.

### FIXED FOR FOOD WASTAGE.

London, June — Heavy fines are being inflicted by magistrates on persons convicted of food wastage. At Highgate a man was fined 50 pounds for feeding pigs with bread, another at Holloway had to pay 10 pounds for a similar offense. A woman manager of a bakery at Finchley was fined 20 pounds for permitting twelve loaves to be wasted.

## Busy Days For Concrete Workers

This is the busy season for concrete work but we can give any job you have careful attention. You will find the prices fair.

COBB ADDS ANOTHER  
TO HIS SEASON'S RECORDSHOOT'S HOT GROUND TO  
RISBERG IN FIRST

Detroit Wins Game From Chicago—  
Rain Causes Postponement of  
Second Game—Boston Takes Both  
Ends of Double Bill from Yankees

Chicago, June 28.—Ty Cobb added another game to his season's record of hitting safely in consecutive games, when he shot a hot grounder toward Risberg in the first inning of today's game. The ball took a bound over the shortstop's head and the official scorer recorded it as a hit. The Georgian now holds a record of hitting safely in twenty-five straight games, five of which were played in this series. Cobb came up five times after he made his safe rap but failed to make another. Detroit won the game from Chicago 6 to 5, in ten innings.

The second game of the scheduled double header was called off at the close of the first contest a heavy rain flooded the field.

Boston 3-5; New York 2-0  
Boston, June 28.—Boston won both games in the double header with New York today the first by 3 to 2, and the second by 5 to 0. Fisher allowed only two Boston hits in the first game, but a successful squeeze play and two errors by Numamaker made it possible for the locals to score their three runs. Leonard was strong in the pinches until the eighth, when two singles and a double gave New York its two runs.

Pennock pitched a heady game for Boston in the second contest while Ray Caldwell was hit hard. The hits also were mixed with bases on balls. Magee of New York was the heavy hitting star making five hits in eight times at bat in the two games.

Alma, Mich., June 28.—Two 30-eds were among the athletes to receive sweaters and letters recently, for prowess in sports at Alma college. Edna Ward, of Cincinnati, and Miss Ritter, of New York City won their "A" for service on the tennis team. Fourteen letters were awarded to football men and eleven were given to members of the baseball team.

Harry Wolter of the Cubs is not gathering safe blows as speedily this season as he did when a member of the Yanks a few years back.

## In the Sporting World

New York, June.—While college athletics are expected to be resumed at a majority of the Eastern universities next Autumn it is generally conceded that prevailing conditions will be vastly different from those governing sport at these institutions in recent years. To some extent new regulations will be necessary and a number of close followers of 'varsity' athletics are of the opinion that the time is opportune for certain reforms in both the spirit and play of the game.

This belief has been voiced in several localities and in some cases where smug hope of a general revival of intercollegiate sport is held out for the next few months. An editorial in the Harvard Alumni Bulletin touches upon this point in a manner which may be said to be typical of other leading institutions in the East. In part it is as follows:

"Altho optimistic articles about the early renewal of intercollegiate athletics have been printed lately, there are no indications that conditions at Harvard next fall will be essentially different from those which now exist.

"Much will depend, of course, on the amount of attention which the under-graduates wish to give to military training; the intensive work now carried on by the Reserve Officers' Training Corps takes practically the whole time of all its members, and such a schedule next year will make it possible for the students to participate in intercollegiate athletics, or even in competition which might be confined to the members of the University.

"If, however, military training is reduced next year to a minimum, the interest in athletics may revive sufficiently to bring about informal contests with other colleges. The development of teams, under such circumstances, must begin from the very bottom. Almost all of the prominent athletes have gone away from Cambridge and are in the training camps, the aviation squads, the naval reserve, the ambulance corps, or some other branch of service in preparation for, or participation in, the war; few if any of them will return to college in the autumn, and their places on the football eleven and the other teams must be filled by new and inexperienced men.

"Such condition of things would not be wholly disadvantageous, for it might tend to change the atmosphere in which intercollegiate athletics have been fostered. There has been no peace in the minds of many enthusiasts 'without victory'. This is the professional rather than the amateur attitude towards competitive sport. The loss of it would be a positive gain."

The return of the University of Michigan to the Western Collegiate Conference is likely to have a marked effect upon Eastern college football schedules when the gridiron game is resumed in this section after the war. Because of her isolated position in her own territory

Michigan has been obliged to look to the East for several big games each season. The Wolverines have played against Pennsylvania, Cornell, Syracuse and Harvard in recent years and in every case the football pupils of Fielding Yost have proved to be strong attractions and opponents.

If Michigan follows the custom of the other conference colleges these yearly inter-sectional gridiron contests will have to be dropped. In the case of Cornell, Pennsylvania and Syracuse it will require considerable search to find an opponent capable of filling the breach made by the withdrawal of the Wolverines.

Howard F. Whitney, secretary of the United States Golf Association, has forwarded to every club holding membership in the organization a request to arrange a special "Liberty Tournament" on the Fourth of July, the proceeds to be donated to the Red Cross. It is suggested that every member of the various clubs be requested to enter and that the entry fee be placed at one dollar. The Red Cross has agreed to present a souvenir medal to each club holding such a tournament and the U. S. G. A. will award a special certificate to commemorate the event.

In order to encourage the continuation of athletic competition and training the New York Athletic Club has arranged to hold a set of weekly track and field games each Saturday during the summer and fall months. About four events will be contested each week and while a nominal entry fee will be charged this will be refunded to all athletes who actually compete. Silver and bronze medals will be awarded for first and second place winners.

Fort Benjamin Harrison, Ind., June.—Soldier athletes now in training camp here are preparing for the biggest athletic field day ever held in Indiana. The meet will be held at the state fair grounds July 4. As the athletes represent the 'cream' of some of the colleges and universities of the middle west spirited competition is expected.

Major Alfred Wilson, of the United States army, who is in charge of the meet is figuring on three hundred contestants. Gold, silver and bronze medals will be awarded the winners; cups will be given winning companies, and individual honors will be recognized by specially marked cups. The medals and cups have been donated by Indiana business men.

The gate receipts will be divided between the Red Cross and a fund set aside for expenses of recreational and social work at the camp. A military atmosphere will be given some of the events. Wall scaling and a tug of war are expected to be among the contests. In addition there will be a mile relay, each contestant carrying full marching equipment after the war. Because of her isolated position in her own territory

The track events include, 100,

220 and 880 yard dashes and low hurdles. The field events will include the discus, and javelin throw, shot putting, running broad jump, high jump and pole vault.

Many of the former college university athletic stars at the camp have been recent competitors. "Big Nine" events, but others have appeared in the colors of the schools. The record of the T. Ohio company is typical. Among the athletes on its roster are Nev. Garfield, of Cleveland, a former football, baseball and basketball star at Yale; M. B. Banks, of Athens, O., who played football and basketball at Syracuse University; I. P. Bells of Cleveland, a guard for three years on the Williams college eleven; James A. Garfield of Cleveland, a former captain of football, baseball and track teams at Williams.

The entire state is requested to join in the novel celebration of Independence Day. Gov. James P. Goodrich, Mayor Bell of Indianapolis, and members of the State Council of Defense are among those back of the meet. As the admission fee will be fifty cents a sum reaching nearly \$5,000 is expected to be realized.

Omaha, June.—The recent withdrawal or retirement of many former automobile speed kings from racing competition will not slow up the speed at the various meets held over the country, but will have a tendency to increase it if anything, according to Joe Thomas, who will drive one of the cars entered in the 150 mile race here on July 4th.

"Many people think that with the withdrawal of Dario Resta, Eddie Rickenbacher and others from the American speedways, racing will be slower, but this is not true," said Thomas. "There are many new stars coming into prominence—young fellows who are anxious to make good and who will drive faster and risk more than the veterans. With the production of faster cars, it is almost inevitable that the old records will be broken this year."

Thomas, who drives an American made car, established a record of 120 miles an hour on the Sheepshead Bay track recently and believes he can make 125 on the local speedway, which is banked at an angle of forty-two degrees, and is a mile and a quarter long.

Fred J. Wagner, of New York, veteran race starter for the American Automobile association will be on hand for the local meet. Professor Levell, of Ames, Iowa, will act as official timer, while T. F. Kennedy, of Omaha, has been named as referee.

St. Joseph, Mo., June.—Business men of St. Joseph have started a drive to sell 6,000 season tickets to raise \$3,000 and keep the Western league club here. Officials of the Commerce club are back of the movement. The team has not been drawing up to expectations.

Jesse Tannehill, former well known big league twirler, has been dropped from the international league umpire staff.

American League batting records fail to show a New York Yankee or a Washington Senator in the 300 swat list.

## MR. AUTO OWNER!

Why throw your old auto tires away when they are good for 2500 to 6500 more miles.

My method of taking two old tires and making one good one is saving thousands of auto owners from 50 to 75 per cent on their bills.

Send me two old tires and I will make one good tire that you can get from 2500 to 6500 more miles out of. In sending me tires be sure one has a good rim no matter how bad the tread is worn. For the other one that has a good tread no matter what condition rim is in.

If You Haven't a Tire with a Good Tread I Can Furnish You One

## PRICES FOR DOUBLE TREADING

When you furnish both tires	When You Furnish one tire	When you furnish both tires	When You Furnish one tire
SIZE	SIZE	SIZE	SIZE
30 x 3	\$2.25	35 x 4	\$3.25
30 x 3 1/2	2.50	36 x 4	3.50
31 x 3 1/2	2.50	36 x 4 1/2	3.50
32 x 3 1/2	2.75	35 x 4 1/2	3.75
34 x 3 1/2	3.00	36 x 4 1/2	3.75
32 x 4	3.00	37 x 4 1/2	4.00
33 x 4	3.00	37 x 5	4.00
34 x 4	3.25		

Where a tire is blown out an additional charge of 50 cents is made. Patches necessary in a tire, an added charge of 35 cents for each 10 inch patch.

Tires sent to me should be prepaid as I pay no transportation charges either way.

A New Five Cent Cigar

Ask for it at your dealers. You will get a mild, sweet, fragrant smoke.

CO-OPERATIVE CIGAR CO.

## Story's Exchange, Real Estate, Loans and Insurance.

### FARM PROPERTY

Sold another farm near Franklin Monday of this week, and listed three new farms in its stead. Which do you want?

(1) Near Sinclair we offer nearly 200 acres, two miles from the station, with two sets of improvements, and mostly in grass.

This is a combination stock and grain farm with some excellent bottom land, good farming upland, and blue grass pastures, with spring water.

You can buy this on easy terms at \$125 per acre, or will take a smaller farm in exchange.

(2) Northwest of the city, a twenty minutes drive in a car, we offer for the first time a farm of 160 acres of prairie and timber edge land that is improved to suit the needs of any high class farmer and his family.

The land is good and has always been well handled. The house is good and well arranged with acetylene lights and many convenient labor saving devices. The barn is good and ample to care for stock and feed for the size of farm. There is a cow barn, hog house, corn cribs, granaries, sheds, garage, windmill, and a real ready-to-use home.

(3) One of the most complete small farms to be found in Morgan Co. lies a forty minutes drive southeast of the city. This is a farm of 80 acres, 60 acres of which is black prairie or dark timber edge land, well tiled, and in a high state of fertility, having been changed and pastured and fertilized until it produces bumper crops every season. There are about 16 acres in corn, 20 in clover, 10 oats, balance blue grass.

The buildings and fences are nearly all new and of the best class.

There is a fine two-story, eight-room house, two large porches, basement with three rooms two of which are concrete; cistern, pump and sink in wash room, and well pump and sink in kitchen. Plenty of large handy closets.

First class oak frame barn floored and stalled for eight horses, and hay mow for 40 tons of hay and shed for implements and machinery.

There is a cow barn with crib and mow, and granaries, large corn cribs, work shop, hog houses, stock scales, and, in fact, everything you need, and no need of repairs for years yet.

We can take a good city residence property as part pay on this farm. When can you go see it?

### MONEY

Not only is your property and money an asset, but so is your credit. Therefore to use all your asset, use your credit in buying land; use your money as far as it will go, then borrow as much again, and thereby purchase twice as much land, and take the "dead-sure-coming" raise in value on twice as many acres. USE YOUR CREDIT—DON'T ABUSE IT.

## PIKE COUNTY BOY IS SOLDIER IN FRANCE

Chester Battershell Writes Interesting Letter from "Somewhere in France"—Gives Vivid Picture of Trench Warfare.

Chester Battershell of Milton, Pike county, known to people here and in Greene county, has for some time been in the army of the Allies in France. He has written a number of interesting letters to his relatives and the following is reprinted from the Milton Beacon. It has also appeared in the White Hall Republican:

Dear Mother:—

By way of a prelude I want to say that by the time this reaches you we will doubtless be on repose somewhere a way back of the lines and may not have an opportunity of weathering another serious attack before my service has expired, so don't worry.

To begin with I guess I have seen one of the most interesting bits of action that has been pulled off since the battle of Verdun. You see we are attached to a Division, and a Division is composed of three regiments with a fighting strength of about 1800 men each.

When we arrived here with our division on April 15th, we were quartered in a little village on a hillside that overlooked a valley about 6 kilometers across. The trenches of both armies were in the valley and the range of hills on the opposite side were occupied by the Germans. Those hills have changed hands five times since we have been here and we have been able to overlook the whole thing. When we came the hills were thickly wooded but now there is hardly a bit of vegetation to be seen anywhere. Swept absolutely clean by shell fire.

First Aid in the Trenches. When our division is attacking we have to run up to the emergency posts just behind the third line trenches. The blesses (wounded) are carried back to us there by hand and we take them back to the field hospitals. The blesses are given first aid and attention in the trenches and at the field hospitals they are tied up permanently then some other ambulance section takes them to the railroad hospitals where they are sent to Paris. As soon as our division comes out of the trenches another division goes in, and we go back and do the evacuating to the railroad hospitals while some other section does the front work. Our division is pretty well shot up and are back to be re-formed and I am stationed at a field hospital in the valley. Business is bad tonight as there hasn't been a load of wounded in for two hours hence the time of this letter.

However, this isn't exactly a healthy place for since I started this letter no less than 20 shells have landed within a radius of 300 yards of the place and one aviator bomb dropped so close that it threw gravel upon the roof. The hospital is just a flimsy portable house and they have no cave, so everytime the shells start coming in everybody hustles out and sits down in a ditch which is scant protection except from flying bits of shell that doesn't come too close.

I think that I am developing a savage sense of humor, however, for every time they start to shell the place I get a good laugh at the head doctor here. His feet seem to be bad and he always comes hobbling out in a pink robe and carpet slippers cussing the Boche Pigs that keep breaking into his sleep. When we get a chance to steal a nap we always go out to the room where they lay out the dead. They are no more gruesome and are more quiet than the wounded they bring in.

Dangerous Curtain of Fire. When there is to be an attack the artillery starts a few hours before to batter down the wire entanglement and machine gun posts of the opposing trench. At the time of the attack the artillery start a barrage or curtain fire. That is they just form a curtain of bursting shells and advance it ahead of the attacking infantry. A very good idea except when thru some miscalculation the infantry advance too fast and are annihilated by their own guns. As soon as the infantry advances to the enemy's trench it's a case of knives, revolvers and hand grenades.

A hand grenade is about the size of a baseball and has a thick iron shell filled with very high explosive. The shell is constructed so that when the grenade explodes it busts into about a hundred slugs and is very deadly. They are fitted with a cap, which is exploded by striking it against some hard substance, and the grenade is timed to explode five seconds after the cap is struck, just allowing time enough for the soldier to throw it.

An attack by either side is usually made in the night and there are always aviators flying over the trenches directing the artillery.

Aviation is interesting. The aviation is by far the most interesting branch of the service. There is a small field near where they keep about 75 or 100 machines and every time I get an afternoon off I spend it over there. I have gotten pretty well acquainted with the aviators and they are always glad to explain the uses and purposes of the different machines. It is surprising the advance that has been made in aviation since the war. They have everything from the one capable of doing 170 miles per hour and looks small enough for one man to carry; to the huge tractor that carry 28 men or 10,000 pounds of bombs. The aviators are the pick of the army and in reality the work isn't as dangerous as the infantry. Besides in modern warfare it is about the only branch of the service that has any romance in it. Those fellows fight their battles alone away up there and it certainly beats being mangled by a shell in a trench.

I guess the Germans have violated all the ethics of war. With their poison gas, liquid fire, and they don't hesitate at any risk to gain a point. For instance a bunch of them will come running with their hands in the air and calling "comrade comrade" in token of surrender. When they get near the French lines they drop down and when it's too late the French find that these fellows have only been acting as a screen to hide a company of machine guns advancing just behind them. A young American fellow who has been in Belgium with the Belgian Relief Society for the past year, was compelled to get out when the U. S. declared war and joined our section the other day. It is very interesting to talk to somebody from the other side. He certainly hates the Germans and he says that while food is very scarce in Germany they may be able to hold out for some time. He says that all the old people and children are dying for want of food.

American Aviator Injured. It always seems good to meet somebody that you can talk to. Carrying French soldiers all the time one gets out of the habit of trying to talk to them. The other night I had a wounded aviator in my car and I stopped on the road to see how they were getting along and imagine my surprise when I stuck my head in the door to hear a voice in the dark say: "drive as easy as you can for it hurts like h—l." It seems that the aviator was an American who had volunteered for the aviation service.

A few days ago I took a drive down an old canal that was built by Napoleon and is still in use. We followed it a few miles back and everything looked so quiet and peaceful with the peasants working in their little gardens and the fruit trees all in bloom, that it was hard to realize that less than 10 miles away men were killing each other by the thousand.

A call came and this is the first opportunity I've had to finish this. I had a rather thrilling experience a few days ago. My car turned completely over and landed right side up. I was driving pretty fast and something about the steering gear broke, I guess. I dropped out while it was upside down for I came too lying in a mud puddle about 10 feet from the wreck that had been my car. It looked about like an accordion that had been pressed together. Luckily I had no blesses in my car and I didn't suffer any injuries except to lose a few acres of skin. I'm still bandaged up a bit but I was able to go on duty with another car the next day. I got joked quite a bit about it. They say that having looped the loop in a Ford that I should get into the aviation corps.

All the fellows in this section have a reputation for wild driving. One of our men was sentenced to 8 days in prison on bread and water for speeding, but our Medicine Division (French for boss) got him out of it, and told us to go ahead and drive fast if we wanted to as we were more efficient than any other ambulance section in this section.

Fired on by Boche. Of course when we have a load of blesses we are compelled to drive slowly for the poor fellows suffer so every time the car hits a bump. When our division was in the trenches we had one post up very near the lines and to reach it we had to run up an exposed road. One afternoon I was returning from there with four blesses in my car that were able to sit up. I was running down this road when the Boche started to shoot at me but thanks to their poor marksmanship each shell would break about 40 yards back of my car. They fired six or seven shots before I got out of sight in some timber. When I was out of the danger zone I looked back to my car and one of the blesses was looking at a dent in the top of the car. I guess he had knocked it in there with his helmet when I went over a lump. It's some satisfaction to me to know that the Germans wasted a hundred dollars or so on me and didn't touch me.

Eat Horse Meat. Our rations are very good. We get the regular army rations which consists of beef, or horse, coffee, one vegetable, bread and a liter of wine every day. Besides this we are allowed 2 francs per man per day by the Ambulance Society and almost every day some of the fellows go into the nearest large town and bring back some treats as jams or honey.

I really mean it about us eating horse. They import them from Australia especially for food purposes and it isn't as bad as you think, once you get used to it.

You folks think living is high in the states but I don't think you know what high prices are. For instance potatoes are 1 franc (20 cents U. S.) a pound. Butter is 4 francs (80 cents U. S.) a pound and such butter as it is. I think it was made before the war started. I hope America will be foresighted enough to start conserving their food before it is too late.

Word just came for us to get ready as we start work at the front tonight. We are to be stationed in a little village they shell every day and there isn't an unwrecked house in the town. When we get news like that I can feel my valor start to skid a little for it is a regular hell hole over there, but we are only to get three days of it then they promise that we are to retire for quite a long rest, so by the time you get this if you haven't already had a cable to the contrary, I will be taking life easy a way back out of danger.

I'll be glad if it for we never feel really safe here even at our camp. When the nights are dark its hard to drive without lights and when its moonlight the Boche aviators are always dropping bombs around. When the moon is very bright they even fly low over the roads and use their machine guns on autos running along the roads.

John Kennedy of the vicinity of Arcadia was added to the list of city aviators yesterday.

## COW RECORDS FOR MONTH ARE GIVEN

Results Compiled by R. E. Stocker for Jacksonville-White Hall Testing Association—Interesting Statistics

The second monthly report for the Jacksonville-White Hall cow testing association has been compiled by R. E. Stocker, the official tester. The figures set forth some interesting facts and show the advantage to owners in keeping records on their herds. The records thus far have shown that a number of cows out of the total 233 in the association as unprofitable, and from his observations thus far Mr. Stocker believes that before the year is over that at least 50 cows out of the number will make such records that their owners will think it wise to dispose of them. The records are given only for the cows that make the best averages. These records prove that 15 cows produced from 15 to 50 lbs. of butter fat during the month, 65 from 30 to 40 and 27 cows produced more than 1,000 lbs. of milk. Ordinarily it is figured that a cow must produce at least 200 lbs. of butter fat a year to prove profitable and the endeavor of the association is to have the members acquire or develop cows that will produce from 250 to 300 lbs. of butter fat and 10,000 lbs. of milk per annum.

G. H. McMahan of Roodhouse is a new member of the association. As a result of some records Albert Hopper of the Sinclair neighborhood has disposed of a Short Horn cow that he owned and has added three registered Holstein cows. Herd averages are given herewith, the first list being for owners who have 18 cows or more:

Head Averages.

No. Lbs. Fat of Butter Cows Milk Fat Fat
Otis Johnson . . . 18 678.8 4.84 32.66
Potter Bros. . . . 18 812.8 3.7 30.30
Reynolds Bros. . . 24 733.5 3.82 28.57
J. P. Doan . . . . . 25 657 4.2 27.95
Howard Stevenson . 20 585 4.67 27.31

Records for herds averaging less than 18 cows follow:

No. Lbs. Fat of Butter Cows Milk Fat Fat
C. W. Clampt 13 1045.8 3.86 40.4
T. H. Buckthorpe . . 6 636.9 4.76 30.32
Nathan Tanner 9 814.3 3.7 30.16
A. L. French 9 662 4.39 29.09
J. M. Stewart 14 633 4.39 27.79

It should be mentioned in this connection that all of Mr. French's cows are two year old Guernseys, seven of the number having calved for the first time in recent weeks.

One of these Guernseys on the French farm produced 876 lbs. of milk with a per cent of butter fat of 4.5 from a total butter fat of more than 29.42 lbs. M. S. McCollister from a grade Holstein heifer secured 1,017 lbs. of milk, percent of butter fat 3.9, total butter fat 39.66. The highest testing herds without regard to quantity of milk produced was as follows:

No. Lbs. Fat of Butter Cows Milk Fat Fat
Otis Johnson 4.84 per cent butter fat
T. H. Buckthorpe 4.76 percent butter fat
Howard Stevenson 4.67 per cent butter fat
Lloyd Luckeman 4.64 per cent butter fat

The Best Producers. Cows producing more than 45 lbs. of butter fat during thirty days are listed below:

No. Lbs. Fat of Butter Cows Milk Fat Fat
J. P. Doan . . . . . 5 1221 5.7 64.60
C. W. Clampt . . . . 7 1800 3.6 64.8
Reynolds Bros. . . . 5 1308 4.5 58.86
C. W. Clampt . . . . 8 1536 3.8 58.37
Otis Johnson . . . . 3 1062 5.2 55.22
Potter Bros. . . . . 7 1170 4.5 52.63
C. W. Clampt . . . . 8 1375 3.3 51.98
T. H. Buckthorpe . . 7 825 6.1 50.32
M. S. McCollister . . 9 966 5.1 49.27

J. P. Doan . . . . . 5 972 4.9 47.63
Potter Bros. . . . . 6 1356 3.5 47.46
W. S. Corsa . . . . . 4 897 5.2 46.64
C. W. Clampt . . . . 9 1153 4 46.2
Nathan Tanner . . . 5 1090 4.3 45.15

Annals of the United States Navy. Annapolis, Md., June 28—Approximately 200 new officers are added to the navy by the graduation of the first class at the United States Naval Academy today. This is the second class to receive diplomas at the academy within three months. The class which ordinarily would have finished this month was graduated last March. It was originally planned to graduate the second class next September, but the need of additional officers for the mosquito fleet led to a decision by the navy department to advance the date still further.

Senreco

The double-service tooth paste, keeps teeth clean AND GUMS HEALTHY.

Keeping the gums healthy and the mouth sweet is very important to health; more teeth are lost through the loosening of the tissue that holds the teeth in place than from decay.

Dental science to-day demands that a tooth paste must keep the gums healthy as well as clean the teeth.

Senreco was formulated to meet this requirement. Hundreds of dentists are prescribing and using Senreco because they have found that it does measure up to that standard.

SENRECO IS A WONDERFUL CLEANSER.

In addition to its remedial properties Senreco is a wonderful cleanser; acts directly on the mucin film, the basis of tartar; leaves the mouth cool and clean-feeling. As some one has expressed it—Senreco gives one a new idea on mouth cleanliness.

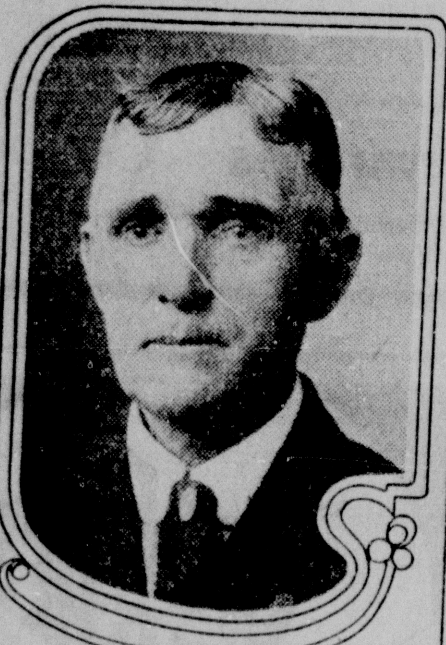

Get a tube to-day at your druggists or toilet counter—enjoy the healthy, cleanly feeling its use gives your mouth and gums. Notice how brilliantly white Senreco makes your teeth. It performs this two-fold service for you and yet costs no more than the ordinary, old-fashioned tooth paste that simply cleans the teeth and leaves a pleasant taste—25 cents for a large 2 ounce tube.

## SURPASSED BY NO OTHER, HE AVERS

"Tanlac's Best Medicine in the World Today," Garrison Asserts

"I really believe that Tanlac is undoubtedly the best medicine in the world today," W. H. Garrison, prominent local contracting carpenter of 333 West College street, told the Tanlac Man on May 28. Mr. Garrison has been a resident of Jacksonville for years and he is well known and highly respected here.

W. H. Garrison.

"For the past five or six years I had suffered from muscular rheumatism," he continued. "It seemed that every muscle in my body would cramp and draw, at times, I simply couldn't sleep at night because of the pains. I couldn't work, either, only about half the time."

"Well, I had been reading in the local papers of Tanlac's good work for my friends and I finally decided to try the new medicine. The change in my condition is little short of remarkable, I'll tell you. Why, I can do all my work now and never experience a single one of the former severe pains. My muscles are not the least bit sore now. I've taken a lot of medicines but none of them ever helped me as Tanlac and I'm only too glad to tell my friends of the new medicine."

There is no season of the year when Tanlac can be taken to better advantage than at the present time. In the spring time, all mankind, after weathering the storms of winter, is in need of an upbuilding, strengthening tonic. In this, as thousands have testified, Tanlac particularly excels. The Master Medicine has also proven beneficial for stomach, liver and kidney trouble, catarrhal complaints, and the like.

Tanlac is now being introduced in Jacksonville at the Coover-Shreve Drug Co., East Side store, where a special Tanlac representative is explaining the new medicine to the public daily. Tanlac also may be obtained at the West Side store of the Coover-Shreve Co. It is sold in Waverly at the Wyle Drug Co.; in New Berlin at the New Berlin Drug Co.; in Ashland at H. O. Brownback's; in Versailles at A. G. Bates'; in Chapin at F. P. McKinney's; in Roodhouse at W. D. Berry's; in White Hall at the City Drug store; in Bluffs at F. T. Curtis'; and in Pittsfield at J. H. Barber & Co.—Adv.

## Keeley Institute For the Treatment of Liquor and Drug Using

Successful for years in difficult cases of both sexes. Patient's improvement begins immediately—no confinement; no use of nauseating or dangerous drugs. Treatment administered only by skilled, kindly physicians. Pleasant surroundings. Home remedies for tobacco using and nervousness. Booklet sent in plain envelope. Write today. The Original Scientific Treatment. THE KEELEY INSTITUTE - Dwight, Ill.

## The First Cry

Every woman's sympathy responds to the sweetness of a baby's voice. The little cry that echoes with the arrival of the new baby is perhaps the fondest and most cherished recollection of our lives.

Thousands of mothers owe their preservation to health and strength to the wonderful preparation "Mother's Friend." This is an external application which is applied to the abdominal muscles. It relieves the tension, prevents tenderness and pain at the crisis and enables the abdomen to expand gently. The muscles contract naturally after baby arrives and the form is thus preserved. It should be applied daily, night and morning, during the period of expectation. Its influence on the fine network of nerves and ligaments just beneath the skin is wonderful. It renders them pliant, and in this way aids nature to expand the abdomen without the usual strain when baby is born.

You will find this wonderful preparation on sale at every drug store. "Mother's Friend" is prepared by the Bradford Regulator Co., Dept. C, 290 Lamar Building, Atlanta, Ga. They will send you an intensely interesting book, without charge, "Motherhood and the Baby." Write them to mail it to you. It is of the utmost importance that every expectant mother aid nature in her work. Do not neglect for a single night to use "Mother's Friend." It is absolutely and entirely safe.

## WORK TO BE PUSHED ON ARMY CANTONMENTS

Government Seeks Greatest Possible Speed and Avoidance of Useless Expenditure in Contracts Let for Work.

The War Department authorizes the following:

How the War Department will do business with the contractors who will build the 16 great cantonments for the new National Army of over 600,000 men is indicated in an outline of the form of contract just made public. This form has been adopted as an emergency measure because of the necessity of completing these military cities, each for a population of about 40,000 persons, at a very early date. The necessity of avoiding useless expenditures have been the main considerations. It has been impossible, under this policy, to wait until all the plans are finished, the work advertised, and a lump-sum contract made for each cantonment.

**Quick Construction Urged.**

The urgency of quick construction is indicated in an early paragraph of the contract when it, according to the wording the contractor agrees to "do all things necessary for the construction and completion of the work. The Government's interests are safeguarded by a clause permitting its representatives to terminate the contract at will. As there are no restrictions in the agreement which are considered likely to hamper the contractor it is not expected that there will be any serious differences of opinion between the Government and any of the firms chosen for the work. The concerns undertaking the various items of construction are given every possible help and incentive to put themselves in the position of being trustees of the Government detailed to provide the best homes for the new troops which it is practicable to give in the time available for the work.

The most interesting features of the form of contract just passed are those governing the financial relations between the Government and the contractor. The latter is to be paid his expenses and a percentage of their total amount, out of which he must meet his overhead costs. The contractor's profit will come in the difference between this percentage and overhead expenses. The maximum amount on any contract is fixed as \$250,000.

**Reimbursements Promised.**

The Government promises to reimburse the contractor on the following items for which he makes an outlay.

1. All labor, materials, and machinery necessary for the work. No departure from the standard rate of wages in the locality may be made without the consent of the Government's representatives.
2. All subcontracts.
3. Rental for construction equipment hired or owned by the contractor at rates fixed in detail on the contract. The rates may be judged from the daily rental of \$5 permitted for the use of an automobile.
4. Transporting, setting up, and dismantling such equipment.
5. Transportation of field forces engaged in the work.
6. Salaries of resident engineers, superintendents, timekeepers, foremen, or other men in the contractor's field office.
7. Building, field office supplies, equipment, commissary department, and hospital expenses required during construction.
8. Insurance and bonding expenses, uninsured losses and expenses incidental to the work and approved by the Government's representatives.
9. Fees, deposits, royalties and similar necessary expenses.
10. Transportation, traveling and hotel expenses of contractor's employees actually incurred in the work.

**Has Sought Flexibility.**

The Government has endeavored to give the maximum amount of flexibility to the contract in order that all low rates accessible to the Government in the matter of materials and other items of expenditures may be utilized. For instance, the Government may pay any or all freight charges incurred in obtaining material and machinery; which would tend to reduce the amount on which it must pay a percentage to the contractor. Also, thru this arrangement, advantage could be taken of the specially low rates which the Government obtains from land-grant railroads.

Freight charges on hauls over 500 miles must be specially approved in every case by the Government's representative. The title to all work in progress or completed is in the United States and all materials and machinery for which the contractor is to be paid, under clause 1 of the preceding classification of expenses, belong to the United States as soon as accepted in writing by its representative.

**Profit Limited to \$250,000.**

The contractor is to furnish a bond for \$250,000. His profit and overhead expenses must come from an additional payment made by the Government and amounting to 6 per cent of his expenses as enumerated above in cases where the work costs over \$2,500,000 and running up to 10 per cent if the total is under \$100,000. The total amount of this percentage payment will in no case be allowed to run over \$250,000, no matter how high the total cost of the work may be.

The value of any construction equipment furnished by the Government is not included as a part of the cost of the work when determining the contractor's percentage, nor any uninsured fire or liability losses which the Government may pay to him under clause 8, nor any payments by the Government for freight, nor any of his overhead expenses. The contract fixes his compensation on the cost of work done by subcontract

tract at 5 per cent and on the reconstruction of damaged work not over 7 per cent.

**Provision for Monthly Payments.**

Provision is made for monthly payments for actual expenses approved by the Government's representatives who have access at all times to the accounts kept by the contractor. This puts the minimum strain on the contractor's financial resources while giving the Government a complete check on the accuracy and propriety of every item before payment is made on it.

Contracts have been accepted for five of the cantonments. The first four were contracted for some time ago, and the contract for building the cantonment at American Lake, Wash., was announced last week, the successful firm being the Hurley-Mason Co., of Tacoma, Wash. The other four cantonments will be built by the following firms: Ayer, Mass., F. J. Ley & Co., Springfield, Mass.; Wrightstown, N. J., Irwin & Leighton, Philadelphia, Pa.; Columbia, S. C., Hardaway Construction Co., Columbus, Ga.; Atlanta, Ga., Arthur Tufts Co., Atlanta, Ga.

## FOOD CONSERVATION

### Milk

Enthusiasm for economy in the use of foods has led some folk to make the mistake of reducing the milk supply. It is far wiser to cut on the butcher's bill rather than dairy bills, for milk is yet the cheapest and most nearly complete food we have. When milk costs ten cents a quart, enough beefsteak to yield as much nutriment would cost nineteen cents; potatoes, eggs, twenty-four cents; fresh dry beans, thirty-eight cents; or dry navy beans, eleven cents. From these comparisons we see that even at fifteen cents a quart milk would yet be cheaper than many other staple foods.

While milk is perhaps the best staple food, it is also the most easily contaminated. It should not be bought in bulk but only in sealed receptacles, and it should be kept in a cool place. Skimmed milk, which is usually half the price of whole milk, contains half the total fat value but all the valuable protein and mineral content and should be freely used in cream soups, in dressing vegetables, and in puddings, sherbets, junkets and other desserts. It is safer to use milk in cookery than to use it raw as a beverage. Milk is the best possible food for children because both its protein and its minerals are the best ones known for promoting growth and its fat contains specific growth promoting substances. Often when they have grown to dislike it as a drink they will get a sufficient supply of it is wisely used in cookery. Used freely in the dietary the protein content of milk may be made to replace, in a large measure, more expensive proteins of meat and eggs, and the fat is a bulky food, being 47 per cent water, since most people do not drink a sufficient amount of water. Milk will serve a good purpose in making up that deficiency.

A good formula for cream soups is the following which is recommended by Simmons College:

**Cream Soups**  
1 quart skimmed milk.  
1/4 cup butter, oleo margarine, or lard at fat.  
2 cups flour.  
2 teaspoons salt.

Melt the fat and stir into it the flour. When these are thoroughly mixed, add the cold milk and heat until the flour is cooked, stirring constantly until the milk boils. This may be used as a foundation for any kind of cream or vegetable soup by adding mashed vegetables mixed with water in which it has been cooked to give the consistency of the thickened milk. The amount of vegetables necessary will depend upon the strength of the flavor. For instance a half cup of vegetable stock from onion, cabbage, or turnip will be sufficient for a quart of the cream soup, while a full cup of carrots, squash, peas, beans, corn or tomatoes would be used with good results. When vegetables have been left from a former meal they may be used to good purpose in making cream of vegetable soups in this manner, and oftentimes the wise housewife plans to cook enough of the vegetable to keep some in reserve for cream soups.

This is only one of the ways in which skimmed milk is valuable in cookery. In many types of puddings, the skimmed milk is quite as good as the whole milk. So it is also in fruit sherbets and in junkets which are light and desirable summer desserts.

The following formula for lemon milk sherbet, also recommended by Simmons College, may be varied by the use of other sweetened fruit juices in the place of lemon and syrup.

**Lemon Milk Sherbet**  
1 quart skimmed milk.  
1 cup lemon juice.  
1/2 cup syrup.

Combine lemon juice and syrup and gradually add the milk. The milk should be added slowly with constant stirring in order to avoid curdling. Freeze.

**SIGMA CHI CONVENTION.**  
St. Louis, Mo., June 28.—College men from all parts of the country to the number of several hundred assembled at Washington University today for the opening of the annual grand chapter meeting of the Sigma Chi fraternity. The fraternity is one of the oldest and most prominent of the Greek letter societies in America. It was organized at Miami university in 1855 and now has a membership of 15,000, with active chapters at 68 colleges and universities. Among its well known members are Brand Whitlock, Booth Tarkington and George Ade.

Pitcher Bert Gallia of the Washington Senators made a season's record recently when he uncorked four wild heaves in one inning in a game against the White Sox.

## MANY ATTEND BLUFFS RED CROSS MEETING

Judge Weaver of Springfield Principal Speaker of Evening—Program Interesting Thruout and Much Enthusiasm Prevailed.

Bluffs, June 28.—The Red Cross mass meeting held at the Mehan theater Tuesday night drew a crowded house and a very interesting and enthusiastic meeting was held. Judge Weaver of Springfield, Rev. Caseley of Winchester and other able speakers were present. In addition to the regular meeting the following special program was given:

Music—Orchestra.  
Song, America—Audience.  
Reading, Red Cross Spirit—Miss Winifred Ashley.

Song, "Star Spangled Banner," with pantomime—Mr. Norman Campbell, (Merritt) assisted by Mrs. P. M. Green, Misses Dorothy Griswold, Zoe Fitzpatrick and Ruth Kilpatrick.

The quota of members for Bluffs and vicinity is 257, and the workers are earnestly striving to reach the goal. The ushers were prettily attired as Red Cross nurses.

Mrs. O. A. Woodson returned Tuesday evening from Ft. Scott, Kans., where she was called by the death of her cousin, Wilson Carver, aged 20 years and only son of the late Dr. Jesse Carver, a former Bluffs resident. The death occurred at Kansas City where he was crushed by an elevator in the establishment of the Jones Leather Co. He was a student at the Kansas University for the past year and a graduate of the Ft. Scott high school.

Miss Frances Dowell of Morrisonville is the guest of Otto Bossee household.

Mrs. E. W. Stone of Beardstown is visiting her son, R. H. Stone and family.

Forrest Adkins was a Meredosia visitor Wednesday.

Charles Collins and family left for a visit with relatives in Kentucky.

M. E. Bennett has returned from the Wabash hospital in Decatur, where he went for treatment, not improved in health.

Judge Funk of Winchester was a business visitor here Thursday.

Mrs. Gus Graham of Meredosia spent Wednesday at the home of Mrs. E. A. Shore.

It didn't take Johnny Rawlings of the Braves very long to show regular goods after being chucked into the fray as a regular.

## GOING TO BUILD?

Let Me Submit An Estimate on Entire Job

I will develop your own ideas into a practical SET OF PLANS AND SPECIFICATIONS (Blue Prints)

Execute them to the smallest detail into a building that can be built within your means and to your entire satisfaction.

**A HARD WOOD FLOOR** is the foundation of things beautiful.

I will cover those old floors with quartered oak flooring, cheaper than you can carpet them.

No job too large nor too small for my prompt attention.

**ALICE RICHARDSON,**  
Administratrix  
M. T. Layman, Attorney.

New Regulations in Effect April 1  
Even Specify Amount of Cloth  
Which May Be Used for Suits and  
Dresses—Adequate Wardrobes, Of-  
ficially Fixed.

Berlin, June — (Correspondence  
of the Associated Press)—New regu-  
lations for putting the German  
people on clothes rations came into  
force on April 1. They go into con-  
siderable detail as to the number of  
garments which citizens may possess  
and even specify the amount of  
cloth which may be used for making  
suits and dresses.

The following list of adequate  
wardrobes for men and women is  
officially fixed, and no supply be-  
yond this limit may henceforth be  
purchased:

For men: One everyday suit, one  
Sunday suit, one overcoat or cape,  
two smocks or jerseys, two waist-  
coats, two pairs working trousers,  
two pairs overalls, one pair winter  
gloves, 6 handkerchiefs, three shirts,  
three suits underclothes, two night-  
gowns, and four pairs stockings.

For women: Two everyday dresses,  
one Sunday dress, one extra skirt,  
two blouses, one cloak or cape, one  
shawl, one dressing gown, three  
aprons, one pair winter gloves, six  
handkerchiefs, four chemises, three  
nightgowns, three suits of under-  
clothing, three petticoats, and four  
pairs stockings.

Both men and women are limited  
to three pairs of shoes, one pair of  
house slippers, three pillow cases,  
two sheets, two blankets, one eider-  
down, three towels, two kitchen  
towels, and three dusting towels.  
Both men and women are limited to  
three and a quarter yards of ma-  
terial for a suit or dress. Trousers  
must not be made "turned up" and  
overcoats must not have pleats or  
belts.

**WOMEN TO SERVE IN  
MEDICAL MISSION.**

London, June 28.—The services of  
the many thousands of women now employed  
as Red Cross workers in war hospitals  
are to be enlisted, after the war, in  
the service of medical missions abroad. Such  
a movement has been begun by the So-  
ciety for the Propagation of the Gospel.

## GOOD ADVICE

### A Jacksonville Citizen Gives Information of Priceless Value.

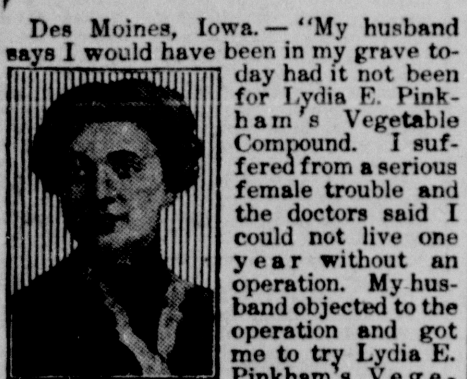

When you suffer from backache, Headaches, dizziness, nervousness, Feel weak, languid, depressed, Have annoying urinary disorders; Do you know what to do? Some Jacksonville people do. Read the statement that follows. It's from a Jacksonville woman. Testimony that can be investigated.

Mrs. Doyle, 718 N. East St., Jacksonville, says: "I have used Doan's Kidney Pills for general weakness of my kidneys and they have helped me a whole lot. I recommend Doan's Kidney Pills very highly to others who may need such a medicine."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Doyle had. Foster-Milburn Co., Props., Buffalo, N. Y.

## THIS WOMAN TOLD TO CHOOSE

Between Operation and Death. Cured by Lydia E. Pinkham's Vegetable Compound.

Des Moines, Iowa. — "My husband says I would have been in my grave today had it not been for Lydia E. Pinkham's Vegetable Compound. I suffered from a serious female trouble and the doctors said I could not live one year without an operation. My husband objected to the operation and got me to try Lydia E. Pinkham's Vegetable Compound. I soon commenced to get better and am now well and able to do my own housework. I can recommend Lydia E. Pinkham's Vegetable Compound to any woman as a wonderful health restorer." — Mrs. BLANCHETTE JEFFERSON, 703 Lyon St., Des Moines.

This famous remedy, the medicinal ingredients of which are derived from highly prized roots and herbs, has for forty years proved its value in such cases. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

Poor, helpless, hopeless, sick, suffering, miserable woman. Sick because she doesn't know any better. Sick because she doesn't really know why. Sick because the organs that make her a woman are not properly performing their functions and so are sending nerve messages with aches and pains and distress all over her quivering body.

Nine-tenths of women's sickness comes from disorder of these special organs. The symptoms are various—the cause the same. Dr. Pierce's Favorite Prescription cures the headache, backache, nervousness, weakness, neuralgia and fifty other troubles of women which can always be traced directly to feminine weakness or disease. Thousands of women right here in Illinois, after years of discouragement, have written to Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., and now thank him for their renewed health and happiness.

Ottawa, Ill. — "I have used Dr. Pierce's Favorite Prescription. At one time when rather run-down I took two bottles. I found it just as represented—a first-class tonic and nerve. I have always heard it well spoken of and prized by all women who have used it." — Miss ANNA SMITH, 409 Jefferson St., Ottawa, Ill.

It is a medicine devised to cure one certain kind of disease—female disease. It brings ease and comfort and sleep. It restores perfect health. It fills out cheekbones, brightens the eyes, puts vim and snap into the whole body.

If you are a sufferer, if your daughter, mother, sister need help get Dr. Pierce's Favorite Prescription in liquid or tablet form from any medicine dealer to-day. Book on women's diseases sent free.

## MANY FAMOUS BREACH OF PROMISE CASES

Verdict in O'Brien Manning Case Establishes New High Record for This Country—Awards in England More Substantial than in America

New York, June 28.—"Some men seem to think," said a prominent lawyer, who has figured as counsel in many breach of promise actions, "that proposals, like pie-crusts, are only made to be broken, and they are quite pained to find that the breaking is, at times, a costly process."

He was not alluding to the recent sensational case in this city in which Miss Honora May O'Brien, 28 years old, was awarded a verdict for \$250,000 in the action which she brought against the octogenarian banker, John B. Manning, for breach of promise of marriage, but to the hundreds of cases which are tried every year in American courts, in which damages ranging from a few hundreds to several thousand dollars are awarded; and he ventured the opinion that in the course of twelve months defendants in breach of promise cases in this country have to pay as compensation for breaking women's hearts an aggregate amount in excess of \$500,000. For it must be remembered that many cases involving well known people are settled out of court and on terms not revealed, but presumably very substantial.

The verdict awarded Miss O'Brien establishes a new high record for this country. Hitherto the record in American courts for breach of promise damages is that established by Miss Clara Campbell, daughter of a prominent Western forger-master, who some years ago brought an action of breach of promise against the senior member of a firm of coffee merchants, and was awarded \$45,000 damages.

Substantial awards in breach of promise actions have been much more frequent in the English courts than in the courts of this country. Several years ago, following a sensational trial in London, Miss Daisy Markham was awarded \$250,000 in an action which she brought against the Marquis of Northampton for breach of promise.

**Largest Sum Ever Awarded**  
The \$250,000 given Miss Markham as a solatium for the breach represented the largest sum ever awarded in the English courts in such an action. In two previous breach of promise cases, however, \$50,000 damages were awarded. The first was in 1884, when Miss Fortesque, a Savoy actress, brought an action against Viscount Garmoyne, son and heir of the great Lord Chancellor Cairns, for breach of promise. Miss Fortesque was then 25 years of age, and the sum of \$50,000 was agreed upon between the parties when the case came to trial.

Six years later there was tried in London an action for breach of promise brought by Miss Theresa Gladys Knowles, a young lady of 21, niece of Admiral Knowles, who sued Leslie Duncan, a publisher, who was 64 years of age at the time. In the end the jury ordered him to pay \$50,000 to the young lady, who had claimed \$125,000.

Members of the peerage have figured in numerous notable breach of promise actions. Viscount Dangan, (afterwards Earl Cowley) had to pay \$12,500 in 1889 to Miss Phyllis Broughton, while Miss Birdie Sutherland's action against the Hon. Dudley Marjoribanks (afterwards Lord Tweedmouth) was settled in 1895 for \$25,000.

Mention might also be made of the Duke of Manchester in an action brought by Miss Portia Knight. His Grace was sued after his marriage in 1900 to Miss Helene Zimmerman of Cincinnati. The public were looking forward to a sensational trial, when the action was suddenly withdrawn from the lists, a private arrangement having been effected which prevented the case from coming into the courts.

**Ruler of Kingdom Sued**  
One of the most sensational breach of promise cases on record was that in which the ruler of a kingdom was sued for heart balm. This occurred in 1893, when an action was brought against the Sultan of Johore by Miss Jennie Mitchell. That an English girl should bring such an action against an Eastern Prince seemed almost incredible, but she persevered with it so courageously that the alarmed potentate declined to enter a defense beyond a declaration that as a sovereign he could not be sued by a subject, and according to the lady's action must fail because he was not amenable to the laws of England.

Counsel on both sides fought out the question with the greatest zeal, but in the end the Judge upheld the Sultan's defense, and consequently the original case never came into the courts.

**WARNING**  
All persons are warned against the premature celebration of the Fourth of July by discharging firearms, fireworks or fire crackers of any description in the city before the fourth day of July. Violators of the ordinance will be arrested and prosecuted.

George P. Davis, Chief of Police.

## DESCRIBES WORK OF RED CROSS IN RUSSIA

Shorthand of Motor Ambulances Is Serious Problem—Much Depends on America's Answer to Russia's Call for Help—Is Question of Diplomacy as Well as Humanity

(Edward Hungerford of the Vigilantes)

New York, June 28.—Much has been written about the work of the Red Cross along the Western theater of the Great War; little is known about its efforts along the Eastern front. Yet it is upon that very front where the need has been the greatest, and the least has been accomplished. Lieut. Col. M. C. Grow, of the Russian army, who is in the United States for a few weeks before rejoining his command, speaks eloquently of this need. It has been his pet care. A young Philadelphia graduate of Jefferson Medical College Grow went to Russia at the beginning of the war to aid in the work of the Red Cross there. He showed remarkable abilities in organization work—abilities that were quickly recognized by the Russian military authorities, with the result that he was made a commissioned officer with the rank of Lieutenant-Colonel.

"When the war broke out," says Col. Grow, "the American Red Cross recognized the necessities of the Russian situation by sending a base hospital unit over there, consisting of twelve doctors and fifty or sixty nurses. This hospital was quartered by the Russian government in the School of Technology at Kiev, where 200 beds were established. There was plenty of work for it: Its beds were always filled. Nevertheless the hospital was withdrawn in September, 1915. It was announced then that a lack of funds had caused its abandonment."

**Subscriptions Dwindled**  
"By private subscriptions among the American colony at Petrograd a very few of the doctors and nurses were retained. These were sent to Tiflis, where they were of immense service. But the subscriptions dwindled and so, in turn, the American doctors and nurses. Finally there were but two doctors and six nurses. And within the past few months even these have returned to this country."

"Of course Russia has not been entirely dependent upon the labors of the American Red Cross. It is fortunate for it that it has not. For while it has one of the oldest and best equipped Red Cross organizations in the world, dating back to the days of the Crimean War, that organization was entirely unable to cope with the exigencies of such a war as this. The English Red Cross established and still maintains a splendid base hospital in Petrograd. And both the French and the Japanese have been of almost invaluable service thru their Red Cross establishments."

**One Automobile Factory**  
"A very great problem upon the Russian front has been the question of obtaining sufficient ambulances. There is but one automobile factory in the Czar's dominions and that is capable of turning out not more than 200 cars a year. As a large result of this situation the 1200 miles of Eastern front have had but 6000 motor ambulances, as compared with 77,600 upon the 400 miles of French and Belgian front. And the horse-drawn ambulances of Russia! The greater part of them are the typical springless carts, which go jouncing over the unspeakable roads of the Empire—many of them corduroy—with infinite pain to their wounded burthen, whose shrieks and cries are heard for a long distance roundabout. But even these transports are very scarce. Men pitifully wounded have had to walk five or six miles to reach them, for a cross-country haul of a few more awful miles to the hospital trains. And when these trains gave up their burdens at Petrograd or Moscow had been in their original dressings for five or six days, and the stench from the supuration of those wounds was almost intolerable."

It is not a pretty story that Col. Grow tells. But it is one that ought to go straight to the hearts of every American that reads it.

**Hospital Trains Needed**  
"It is not base hospitals that Russia needs and needs so greatly at this time," he says, "it is transportation for her wounded—ambulances not by the dozens, but by the hundreds and by the thousands. Hospital trains are needed—modern, sanitary affairs, not the box-cars filled with filthy straw that many times have had to serve for the carrying of wounded men in Russia. She does need hospitals, of course. But these should now be specialists' hospitals. For instance, there is great need of orthopedic institutions—surgical-mechanical plants which can fit and turn out braces and artificial limbs of every sort. Today if a wounded Russian soldier loses a leg he is turned out of the hospital when the wound is healed, given three rubles and sent to beg upon the city streets. Nothing is being done toward making him a useful citizen of the nation once again."

"The question is not, in its final analysis, one of humanity alone. Great as is that appeal, the question of diplomacy is even greater. If America can aid in the comfort of the Russian in the fighting field, if she—in an unmistakable manner—can convince him that she is going to nurse him if he falls wounded, she is going to keep him fighting. He is the finest of soldiers, a loyal, tremendous fighter. But, after all, he is only human. And human comfort and human sympathy, human care, are the things that make the greatest appeal to his imagination and his understanding."

Here then is Russia's call for help. The answer to it rests with America—not along in the official America which concerns itself with diplomacy—but quite as much in individual America; in the hearts and minds of American men and women. The an-

swer as to whether the Red Cross shall help poor Russia rests with you and it rests with me. It is a question for individual consciences—for yours, for mine. What is your answer to it?

## WHAT IS THE WORD OF THE LORD

By Clinton Scollard of the Vigilantes  
What is the word of the Lord veiled in His far blue fastness?  
What is the word of the Lord unto our moiety of earth?  
What is the word of the Lord out of the vague and the vastness?  
What is His burning word in these days of dolor and dearth?

He hath given us a sword, a falchion to swing and smite with,  
To smite till it flinch and quail,  
The dark dread Demon of Wrong.  
He hath given to us a brand to grip and brandish and fight with,  
And bidden us go to battle, the song on our lips His song!

"On!" is the word of the Lord;  
"On!" to our girded legions,  
Whether they tread the land, or venture the paths of the sea;  
"On!" till the children of earth, aye, its uttermost regions,

Be free from the Demon's threat,  
From the Demon's might be free!

## FARMERS' CO-OPERATION A SUCCESS

Waterville, Me., June 28.—Co-operation in buying, selling and production has proved a big boon to the farmers of Maine, according to reports to be presented to the annual meeting of the Maine Farmers' Union Grain and Supply Company which met in this city today for a two-day session. The co-operative system, first launched in this state four years ago, has spread until now it embraces nearly 100 local farmers' unions representing as many towns and localities, each with a capital of \$10,000 and with a general state union through which extensive co-operative buying is carried on. The system has already reduced the cost of sugar 70 cents a hundred pounds, grass seed 60 cents a bushel, paris green 10 cents a pound, copper sulphate 4 cents a pound, and paint 40 to 90 cents a gallon.

Miss Ethel Stewart, 528 Reid street, daughter of Allen Stewart of the clothing house of Myers Brothers has gone to Louisiana, Mo., to visit her brother, Allen, who is a member of Company B.

# You'll enjoy the 4th. in one of our--- KEEP COOL SUITS
